Nature And Architecture:

The Culture of Nature in the History of Design Kjetil Fallan, 2019-03-26 The Culture of Nature in the History of Design confronts the dilemma caused by design's pertinent yet precarious position in environmental discourse through interdisciplinary conversations about the design of nature and the nature of design. Demonstrating that the deep entanglements of design and nature have a deeper and broader history than contemporary discourse on sustainable design and ecological design might imply, this book presents case studies ranging from the eighteenth to the twenty-first century and from Singapore to Mexico. It gathers scholarship on a broad range of fields/practices from urban planning/landscape architecture and architecture to engineering design/industrial design/furniture design and graphic design. From adobe architecture to the atomic bomb, from the bonsai tree to Biosphere 2, from pesticides to photovoltaics, from rust to recycling, the culture of nature permeates the history of design. As an activity and a profession always operating in the borderlands between human and non-human environments, design has always been part of the environmental problem whilst also being an indispensable part of the solution. The book ventures into domains as diverse as design theory, research, pedagogy, politics, activism, organizations, exhibitions, and fiction, and trade literature to explore how design is constantly making and unmaking the environment and conversely how the environment is both making and unmaking design. This book will be of great interest to a range of scholarly fields from design education and design history to environmental policy and environmental history.

Ian McHarg / Dwelling in Nature Ian L. McHarg, James Corner, 2007-01-25 One of the legendary figures in twentieth-century landscape design, Ian McHarg transformed the fields of landscape architecture and planning through his personal methodology, his unique curriculum at the University of Pennsylvania, and his own inspired writing. In classic texts such as his landmark 1969 book *Design with Nature*, McHarg painted an incredibly rich and exuberant picture of the organic world while conjuring up a vision of a more wholesome and productive metropolis. In this new entry in the popular *Conversations with Students* series, we are proud to make McHarg's never-before-in-print lecture *Collaboration with Nature* available for the first time. Captured on tape in the 1970s, the lecture is the sequel to *Design with Nature*. This is a must-read for anyone in the fields of landscape architecture, environmental science, and urban planning. *Design Ecologies: Sustainable Potentials in Architecture* Lisa Tilder, Beth Blostein, 2010 This title explores current interpretations of contemporary ecological practices in architecture, landscape architecture, and community design. It includes a list of contributors including Jane Amidon and Blaine Brownell. Nature-Based Design in Landscape Architecture Bruce Sharky, 2024-02-28 *Nature Based Design in Landscape Architecture* showcases a range of built works designed by landscape architects from many countries of the world, representing diverse environmental regions and uses. These projects demonstrate the transformative potential of a nature-based approach to landscape architecture. The nature-based design approach supports and encourages natural regeneration with a view to promoting sustainable environments, preserving natural resources, and mitigating the impacts of climate

change and development The projects selected for this book demonstrate the potential of nature based landscape design to support healthy natural and managed ecosystems sequester carbon and support the recovery of biodiversity In addition to examples of design led environmental interventions Nature Based Design in Landscape Architecture the book also demonstrates the potential for nature based design to improve people s relationship with their surroundings by encouraging them to be active participants in their communities As such each project featured in the book promotes a discussion around future scenarios in which landscape architects can and will be engaged from minimizing environmental impact through sustainable design to fostering social justice through community engagement This book will be a welcome supplement for undergraduate landscape architecture survey or design studio courses and may also be used at the master s degree level either as part of a landscape architecture survey seminar or early design studio

Nature in Design Alan Powers,1999 This book presents nature as the ultimate sourcebook for design and explores nature s influence on architecture engineering interiors fashion manufacturing and graphic design It features the work of leading designers such as Issey Miyake Ron Arad William Morris and Frank Genry back cover

The Return of Nature Preston Scott Cohen,Erika Naginski,2014-07-09 The Return of Nature asks you to critique your conception of nature and your approach to architectural sustainability and green design What do the terms mean Are they de facto design requirements Or are they unintended design replacements The book is divided into five parts giving you multiple viewpoints on the role of the relations between architecture nature technology and culture A detailed case study of a built project concludes each part to help you translate theory into practice This holistic approach will allow you to formulate your own theory and to adjust your practice based on your findings Will you provoke change design architecture that responds to change or both Coedited by an architect and a historian the book features new essays by Robert Levit Catherine Ingraham Sylvia Lavin Barry Bergdoll K Michael Hays Diane Lewis Andrew Payne Mark Jarzombek Jean Francois Chevrier Elizabeth Diller Antoine Picon and Jorge Silvetti Five case studies document the work of MOS Architects Michael Bell Architecture Steven Holl Architects George L Legendre and Preston Scott Cohen

Artificial Nature Architecture Luis de Garrido,2011 Luis de Garrido is pioneering a new architectural concept Artificial Nature An artificial eco system incorporating manmade artefacts and buildings with its own rules and which evolves alongside the natural eco system

Nature and Ideology Joachim Wolschke-Bulmahn,1997 The essays in this volume explore the broad range of ideas about nature reflected in twentieth century concepts of natural gardens and their ideological implications They also investigate garden designers use of earlier ideas of natural gardens and their relationship to the rich model that nature offers

Exploring the Boundaries of Landscape Architecture Simon Bell,Ingrid Herlin,Richard Stiles,2011-02-20 What have cultural anthropologists historical geographers landscape ecologists and environmental artists got in common Along with eight other disciplines from domains as diverse as planning and design the arts and humanities as well as the social and natural sciences they are all fields of

importance to the theory and practice of landscape architecture In the context of the EU funded LE NOTRE Project carried out under the auspices of ECLAS the European Council of Landscape Architecture Schools international experts from a wide range of related fields were asked to reflect each from their own perspective on the interface between their discipline and landscape architecture The resulting insights presented in this book represent an important contribution to the development the discipline of landscape architecture as well as suggesting new ways in which future collaboration can help to create a greater interdisciplinary richness at a time when the awareness of the importance of the landscape is growing across a wide range of disciplines Exploring the Boundaries of Landscape Architecture is the first systematic attempt to explore the territory at the boundaries of landscape architecture It addresses academics professionals and students not just from landscape architecture but also from its neighbouring discipline all of whom will benefit from a better understanding their areas of shared interest and the chance to develop a common language with which to converse
