

Preferred Regimens

BEP = Bleomycin/etoposide/cisplatin

EP = Etoposide/cisplatin

Other Recommended Regimens

VIP = Etoposide/ifosfamide/cisplatin

[†] See Risk Classification for Advanced Disease (TEST-D).

[‡] See Primary Chemotherapy Regimens for Germ Cell Tumors (TEST-E).

⁹⁹ RPLND is recommended within 4 weeks of CT scan and 7–10 days of marker measurement.

^{‡‡} See Principles of Surgery for Germ Cell Tumors (TEST-H*).

^{||} Referral to high-volume centers should be considered for surgical resection of masses post-chemotherapy.

ⁿⁿ Available online, in these guidelines, at NCCN.org.

⁹⁹ Consider consultation with a high-volume center.

^{††} To assess response after treatment, CT with contrast of chest/abdomen/pelvis and any other sites of disease is recommended.

^{‡‡} If intermediate risk is based on LDH 1.5–3 times the upper limit of normal, then BEP for 3 cycles can be considered.

^{§§} Patients who may not tolerate bleomycin.

ⁿⁿ Recommend referral to a high-volume center.

Brant,Diane G. Cope,Marlon Garzo Saría,2023-06-30 NEW Updated content throughout reflects the 2022 OCN Examination blueprint along with the latest national and international guidelines and the most current research evidence NEW A Myelofibrosis chapter is added to address this important cancer type and a Social Determinants of Health and Financial Toxicity chapter addresses the cost of cancer treatment and financial burden of cancer treatment on patients and families NEW COVID 19 related content reflects the impact of the ongoing pandemic including differential diagnoses for pulmonary symptoms and the impact of delayed cancer diagnosis and treatment NEW Updated emphases mirror those of the American Association of Colleges of Nursing 2021 Essentials as well as the recommendations of the 2020 2030 Future of Nursing report *The Bethesda Handbook of Clinical Oncology* Jame Abraham,James L. Gulley,2022-07-14 Offering up to date authoritative information in a quick reference format The Bethesda Handbook of Clinical Oncology Sixth Edition is a comprehensive yet concise review of the management of different cancer types Drs Jame Abraham James L. Gulley and a team of expert contributors emphasize practical information that can be applied in everyday patient care situations and thoroughly revised content keeps you current with advances in this fast changing field **Diagnosis and Management of Testicular Cancer** Susanne Krege,2015-05-27 This book presents the views of leading European experts on the diagnosis and management of testicular cancer with coverage of current hot topics in the field It opens by providing an overview of the recommendations in the most recent consensus paper from the European Germ Cell Cancer Consensus Group which is based on interdisciplinary cooperation among urologists medical oncologists radio oncologists pathologists and basic scientists The remainder of the book focuses on areas of controversy in the diagnosis treatment and follow up of

testicular cancer In each case the evidence base is discussed and results from the most recent studies are reviewed drawing attention to new findings that might alter treatment recommendations The treatment related chapters cover a broad range of issues including the best approach in patients with poor prognosis and recurrent disease and those with long term toxicities Relevant aspects of survivorship care are also addressed The book will help clinicians and practitioners to achieve the goals of minimizing therapy and its side effects without reducing efficacy in low stage disease improving the cure rate in advanced disease and enhancing follow up and long term survivorship

Cancer Nursing Connie Henke Yarbro, Debra Wujcik, Barbara Holmes Gobel, 2016-09-19 Cancer Nursing Principles and Practice Eighth Edition continues as the gold standard in oncology nursing With contributions from the foremost experts in the field it has remained the definitive reference on the rapidly changing science and practice of oncology nursing for more than 25 years Completely updated and revised to reflect the latest research and developments in the care of patients with cancer the Eighth Edition includes new chapters on the biology of cancer sleep disorders and palliative care across the cancer continuum The Eighth Edition also includes significant updates to the basic science chapters to reflect recent increases in scientific knowledge especially relating to genes and cancer Also heavily revised are the sections devoted to the dynamics of cancer prevention detection and diagnosis as well as treatment oncologic emergencies end of life care and professional and legal issues for oncology nurses

Disease Control Priorities, Third Edition (Volume 3) Hellen Gelband, Prabhat Jha, Rengaswamy Sankaranarayanan, Susan Horton, 2015-10-29 Volume 3 Cancer presents the complex patterns of cancer incidence and death around the world and evidence on effective and cost effective ways to control cancers The DCP3 evaluation of cancer will indicate where cancer treatment is ineffective and wasteful and offer alternative cancer care packages that are cost effective and suited to low resource settings Main messages from the volume include Quality matters in all aspects of cancer treatment and palliation Cancer registries that track incidence mortality and survival paired with systems to capture causes of death are important to understanding the national cancer burden and the effect of interventions over time Effective interventions exist at a range of prices Adopting resource appropriate measures which allow the most effective treatment for the greatest number of people will be advantageous to countries Prioritizing resources toward early stage and curable cancers is likely to have the greatest health impact in low income settings Research prioritization is no longer just a global responsibility Providing cancer treatment requires adequate numbers of trained healthcare professionals and infrastructure beyond what is available in most LMICs especially low income countries Careful patient monitoring is a requirement of good quality cancer care and this often involves laboratory tests in addition to clinical examination Even if financing were immediately available to build or expand a cancer control system reaching capacity will take many years

Oxford Textbook of Oncology David J. Kerr, Daniel G. Haller, Cornelis J. H. van de Velde, Michael Baumann, 2016-01-28 Now in paperback the Oxford Textbook of Oncology reflects current best practice in the multidisciplinary management of cancer written and edited by internationally recognised leaders

in the field Structured in six sections the book provides an accessible scientific basis to the key topics of oncology examining how cancer cells grow and function as well as discussing the aetiology of cancer and the general principles governing modern approaches to oncology treatment The book examines the challenges presented by the treatment of cancer on a larger scale within population groups and the importance of recognising and supporting the needs of individual patients both during and after treatment A series of disease oriented case based chapters ranging from acute leukaemia to colon cancer highlight the various approaches available for managing the cancer patient including the translational application of cancer science in order to personalise treatment The advice imparted in these cases has relevance worldwide and reflects a modern approach to cancer care The Oxford Textbook of Oncology provides a comprehensive account of the multiple aspects of best practice in the discipline making it an indispensable resource for oncologists of all grades and subspecialty interests
