volume demonstrates that the definitions put forward by programmes such as TRUEFOOD and EuroFIR and subsequently adopted by organisations including FAO which have analysed the perception of traditional foods by individuals do not adequately reflect this complexity The concept of tradition being deeply ingrained culturally socially politically and ideologically traditional foods resist any single definition Chapters analyse the processes of valorisation instrumentalisation and reinvention at stake in the construction and representation of a food as traditional Overall the book offers fresh perspectives on topics including definition and regulation nationalism and identity and health and nutrition and will be of interest to students and researchers of many disciplines including anthropology sociology politics and cultural studies
