Quadratic Equations And Social Justice:

Culturally Relevant Arts Education for Social Justice Mary Stone Hanley, Gilda L. Sheppard, George W. Noblit, Thomas Barone, 2013-08-21 A groundswell of interest has led to significant advances in understanding and using Culturally Responsive Arts Education to promote social justice and education. This landmark volume provides a theoretical orientation to these endeavors. Examining a range of efforts across different forms of art, various educational settings, and diverse contexts, it foregrounds the assets of imagination, creativity, resilience, critique, and cultural knowledge working against prevailing understandings of marginalized groups as having deficits of knowledge, skills, or culture. Emphasizing the arts as a way to make something possible, it explores and illustrates the elements of social justice arts education as a way out of no way imposed by dominance and ideology. A set of powerful demonstrations shows how this work looks in action. Introductions to the book as a whole and to each section focus on how to use the chapters pedagogically. The conclusion pulls back the chapters into theoretical and pedagogical context and suggests what needs to be done practically, empirically, and theoretically for the field to continue to develop.

Mathematics for Social Justice: Resources for the College

Classroom Gizem Karaali, Lily S. Khadjavi, 2019-07-09 Mathematics for Social Justice offers a collection of resources for mathematics faculty interested in incorporating questions of social justice into their classrooms. The book begins with a series of essays from instructors experienced in integrating social justice themes into their pedagogy; these essays contain political and pedagogical motivations as well as nuts and bolts teaching advice. The heart of the book is a collection of fourteen classroom-tested modules featuring ready-to-use activities and investigations for the college mathematics classroom. The mathematical tools and techniques used are relevant to a wide variety of courses, including college algebra, math for the liberal arts, calculus, differential equations, discrete mathematics, geometry, financial mathematics, and combinatorics. The social justice themes include human trafficking, income inequality, environmental justice, gerrymandering, voting methods, and access to education. The volume editors are leaders of the national movement to include social justice material into mathematics teaching. Gizem Karaali is Associate Professor of Mathematics at Pomona College. She is one of the founding editors of *The Journal of Humanistic Mathematics* and an associate editor for *The Mathematical Intelligencer* and *Numeracy*; she also serves on the editorial board of the MAA's *Carus Mathematical Monographs*. Lily Khadjavi is Associate Professor of Mathematics at Loyola Marymount University and is a past co-chair of the Infinite Possibilities Conference. She has served on the boards of Building Diversity in Science, the Barbara Jordan Bayard Rustin Coalition, and the Harvard Gender and Sexuality Caucus.

Toward a Libertarian Society Walter Block, 2014-05-15 Walter Block has for decades been one of the most effective and indefatigable defenders of libertarianism. One feature in his writing stands out from his classic *Defending the Undefendable* to the present: He consistently applies the principles of libertarianism to every situation in a bold and original way. Readers of *Toward a Libertarian Society*, a collection of his articles from lewrockwell.com, will find this feature

abundantly on display Block believes that libertarianism has three components foreign policy economic policy and policies on personal liberties He devotes a separate part of the book to each of these components In foreign affairs Block is a resolute non interventionist He is an anarchist who rejects the state altogether but so long as a state exists it should confine its foreign policy to defense against invasion Doing so is in line with the tradition of Washington and John Quincy Adams In our own day Ron Paul has been the foremost champion of non intervention and Paul has few if any more ardent advocates than Walter Block In economic policy Block defends the free market against all types of interference One issue especially concerns him the activities of labor unions Against union advocates Block emphasizes that wages depend on workers marginal productivity Block is equally decisive in macroeconomics He calls for the total abolition of the Fed Block never one to avoid controversy argues that much in the contemporary feminist movement is antithetical to libertarianism Readers will learn his views about abortion stem cell research and punishment theory He is a firm advocate of the possibility and desirability of political secession Reading *Toward a Libertarian Society* is the equivalent of a college course in libertarianism taught by a master teacher
