Quality And Risk Management In Agri Food Chains:

Quality and risk management in agri-food chains Brigitte Petersen, Manfred Nüssel, Martin Hamer, 2023-09-04 An apple a day keeps the doctor away While it may be true that a balanced diet is a prerequisite for good health how good is what we eat and drink every day And is it actually possible to fulfil every customer desire with the vast array of foodstuffs on offer BSE dioxin in eggs EHEC sprouts in the light of repeated food safety crises the issue of quality assurance as well as customer oriented quality management has become of prime importance for the agri food industry This sector features highly complex value added chains which means that quality deficiencies or contaminations can quickly lead to far reaching problems with serious consequences for consumers and businesses What can be done to reduce this vulnerability to crises The only solution is to establish systematic methods of quality management which will facilitate the establishment and protection of high standards across companies This book will show which methods are available and how they can reasonably be used The authors present an easy to read guide which not only includes the most important legal provisions standards and accreditation and certification procedures but also develops practical quality assurance strategies and shows how they can be implemented within the agri food industry *Quality management in food chains* Ludwig Theuvsen, Achim Spiller, Martina Peupert, Gabriele Jahn, 2023-08-28 This publication comprises material on recent studies on quality management in agri food chains Due to several food crisis s e g BSE Foot and Mouth disease and growing demands for food quality and safety quality management systems and quality assurance schemes have been widely adopted in different countries in recent years Scientific knowledge about the features the acceptance and the effectiveness and efficiency of these newly introduced quality management initiatives has remained scarce until now The material by experts in the field focuses on the evaluation of quality management systems and quality assurance schemes The main issues are the costs and benefits of quality management given the influence of the public sector and consumers expectations about food quality and safety Not only are benchmarking and harmonisation methods examined with regard to their impact on the effectiveness of quality assurance schemes but also the role of trust cooperation and integration for efficient quality management is discussed Different economic theories such as microeconomics organization and marketing theory as well as advanced statistical methods are applied Concepts are discussed from the various points of view of industrialised export oriented and developing countries throughout the book The information in this book give a comprehensive review of quality management concepts in food chains and highlight future research directions from a global perspective This book is of interest to all those who concern themselves with the topic be it in academia or in the professional sector **Food Chains: Quality, Safety and Efficiency in a Challenging World** George Baourakis, Prodromos Kalaitzis, Konstadinos Mattas, 2014-01-02 Food Chains Quality Safety and Efficiency in a Challenging World addresses the many issues facing European food producers and other food chain stakeholders who endeavour to improve their competitive position in a highly competitive world food market The

Food Chain is one of the main economic pillars in Europe providing employment and opportunities for economic development in rural areas. It is therefore imperative to continuously monitor the changes that affect the sector in order to allow stakeholders to respond promptly and effectively to the new market conditions. Adjusting to the new market involves new technology, globalization, demographic and social changes within a challenging market environment. In order to adopt these new market parameters, food chain stakeholders need to adapt their activities in order to gain in terms of effectiveness and efficiency. This book was originally published as a special issue of Food Economics Acta Agricultura Scandinavica Section C.

Agri-food Chain Relationships Christian Fischer, Monika Hartmann, 2010. This book is the result of several years of research activity on the topic of how to better link farmers, processors and retailers with each other in order to ensure and improve the supply of food products which meet consumer needs and wants. The book is structured in three parts. Starting with an overview regarding main developments in the agri-food sector with relevance for chain relationships, chapter 1. Part I is mainly concerned with providing the theoretical foundations for analysing agrifood chain relations, chapters 2, 3 and 4. Building on this conceptual basis, the second part presents in depth empirical evidence for different countries' food chains and chain stages regarding the issues of trust and sustainable relationships in agri-food chains, chapters 5 to 14. The red meat industry, beef and pigmeat, is the focus of chapters 5, 7 and 9. Cereals, bread and malting barley are analysed in chapters 5, 7, 8, 10 and 13. Horticultural products, fresh produce and wine are investigated in chapters 6, 12 and 14. Regionally, the studies cover Europe, North America, the USA, China, Australia and the Philippines. While most studies were conducted in developed markets, chapters 6 and 12 look at the particularities of transition or developing economies. As to individual agri-food chain stakeholders, a number of chapters, chapters 5 to 12, 14 and 15, offer and discuss separate findings for farmers, food processors or retailers. Based on the theoretical and empirical findings in the first two parts of the book, recommendations for agribusiness managers, chapter 15, and policy makers, chapter 16, are described in the third part. Chapter 17 discusses avenues for future research.

Risk Management of Foodborne Zoonotic Bacteria from Farm to Table in the Nordic Countries, 2004. This report presents an overview of the existing risk management systems for food-borne zoonotic pathogens within each Nordic country, containing contributions from each country. Each contribution presents the overall food safety policy in that specific country and outlines the structure and organisation of the food control systems, the food safety legislation, the control and registration of foodstuffs and monitoring surveillance programmes. The report includes a discussion on views and experiences concerning risk management for food safety based on the farm-to-table continuum. The strengths and weaknesses of the risk management systems in the Nordic countries are discussed, and it is concluded that the process could be more structured so that the transparency and documentation of the process is improved.
