Fusion for Hydrological Sciences Xing Cai,T.-C. Jim Yeh,2009-09-02 In this rapidly evolving world of knowledge and technology do you ever wonder how hydrology is catching up Here two highly qualified scientists edit a volume that takes the angle of computational hydrology and envision one of the science s future directions namely the quantitative integration of high quality hydrologic field data with geologic hydrologic chemical atmospheric and biological information to characterize and predict natural systems in hydrological sciences **Rational, Robust, and Secure Negotiations in Multi-Agent**

Systems Takayuki Ito,Hiromitsu Hattori,Minjie Zhang,Tokuro Matsuo,2008-04-11 In a completely comprehensive and yet accessible text a variety of hugely accomplished contributors address all aspects of negotiation mechanisms in multi agent systems These include multi issue negotiations concurrent negotiations and strategy proof mechanisms as well as rational argumentation and topics auctions and voting The workshop from which this volume has arisen brought together researchers from these communities to learn about each others approaches **Modern Computational Intelligence Methods for the**

Interpretation of Medical Images Ryszard Tadeusiewicz,2008-01-03 This work by two accomplished Polish researchers provides medical technicians and researchers alike with detailed descriptions of up to date methods used for computer processing and interpretation of medical images The broad scope of the book takes in images acquisition storing with compression processing analysis recognition and also its automatic understanding The introduction provides a general overview of the computer vision methods designed for medical images **Rule Extraction from Support Vector**

Machines Joachim Diederich,2008-01-04 Support vector machines SVMs are one of the most active research areas in machine learning SVMs have shown good performance in a number of applications including text and image classification However the learning capability of SVMs comes at a cost an inherent inability to explain in a comprehensible form the process by which a learning result was reached Hence the situation is similar to neural networks where the apparent lack of an explanation capability has led to various approaches aiming at extracting symbolic rules from neural networks For SVMs to gain a wider degree of acceptance in fields such as medical diagnosis and security sensitive areas it is desirable to offer an explanation capability User explanation is often a legal requirement because it is necessary to explain how a decision was reached or why it was made This book provides an overview of the field and introduces a number of different approaches to extracting rules from support vector machines developed by key researchers In addition successful applications are outlined

and future research opportunities are discussed The book is an important reference for researchers and graduate students and since it provides an introduction to the topic it will be important in the classroom as well Because of the significance of both SVMs and user explanation the book is of relevance to data mining practitioners and data analysts **Shape**

Understanding System Zbigniew Les, Magdalena Les, 2008-01-11 This book presents the results of research into one of the most complex and difficult areas research into thinking and understanding The research was carried out at the newly founded Queen Jadwiga Research Institute of Understanding and is focused on the problem of visual understanding and visual thinking The authors believe this is the first book to attempt to investigate the complexity of visual thinking problems in the context of building the thinking machine Robotic Exploration and Landmark Determination K. Sridharan, Panakala

Rajesh Kumar, 2008-01-04 This book presents hardware efficient algorithms and FPGA implementations for two robotic tasks namely exploration and landmark determination The work identifies scenarios for mobile robotics where parallel processing and selective shutdown offered by FPGAs are invaluable The book proceeds to systematically develop memory driven VLSI architectures for both the tasks The architectures are ported to a low cost FPGA with a fairly small number of system gates

Soft Computing Devendra K. Chaturvedi, 2008-07-20 This book is an introduction to some new fields in soft computing with its principal components of fuzzy logic ANN and EA The approach in this book is to provide an understanding of the soft computing field and to work through soft computing using examples It also aims to integrate pseudo code operational summaries and Matlab codes to present computer simulation to include real world applications and to highlight the distinctive work of human consciousness in machine Applied Pattern Recognition Horst Bunke, Abraham Kandel, Mark

Last, 2008-02-28 A sharp increase in the computing power of modern computers accompanied by a decrease in the data storage costs has triggered the development of extremely powerful algorithms that can analyze complex patterns in large amounts of data within a very short period of time Consequently it has become possible to apply pattern recognition techniques to new tasks characterized by tight real time requirements e g person identification and or high complexity of raw data e g clustering trajectories of mobile objects The main goal of this book is to cover some of the latest application domains of pattern recognition while presenting novel techniques that have been developed or customized in those domains

Speech, Audio, Image and Biomedical Signal Processing using Neural Networks Bhanu Prasad, S.R.M. Prasanna, 2008-01-03 Humans are remarkable in processing speech audio image and some biomedical signals Artificial neural networks are proved to be successful in performing several cognitive industrial and scientific tasks This peer reviewed book presents some recent advances and surveys on the applications of artificial neural networks in the areas of speech audio image and biomedical signal processing Its chapters are prepared by some reputed researchers and practitioners around the globe
