representative examples of the most significant and engaging scholarly writing on Chopin by a wide range of authors. The essays selected for the volume portray a rounded picture of Chopin as composer, pianist, and teacher of his music and of his overall achievement and legacy. Historical perspectives are offered on Chopin's biography as cultural discourse on the evolution and origins of his style and on the contexts of given works. A fascinating contemporary overview of Chopin's oeuvre is also provided. Seven source studies assess the status and role of Chopin's notational practices as well as some enigmatic sketch material. Essays in the field of performance studies scrutinise the cultural work carried out by Chopin's performances and discuss his playing style along with that of his contemporaries and students. This paves the way for a body of essays on analysis, aesthetics, and reception, considering aspects of genre and including an overview of analytical approaches to select works. The remaining essays address Chopin's handling of form, rhythm, and other musical elements as well as the meaning of his music. The collection as a whole underscores one of the most important aspects of Chopin's legacy: namely, the paradoxical manner in which he drew from the past in particular certain eighteenth-century traditions while stretching inherited conventions and practices to such an extent that a highly original music of the future was heralded.

Daniels' Orchestral Music David Daniels, David W. Oertel, David A. Rahbee, 2022-06-30. Daniels' Orchestral Music is the gold standard for all orchestral professionals: from conductors, librarians, programmers, students, administrators, and publishers to even instructors seeking to research and plan an orchestral program, whether for a single concert or a full season. This sixth edition, celebrating the fiftieth anniversary of the original edition, has the largest increase in entries for a new edition of Orchestral Music: 65% more works (roughly 14,050 total) and 85% more composers (2,202 total) compared to the fifth edition. Composition details are gleaned from personal inspection of scores by orchestral conductors, making it a reliable one-stop resource for repertoire. Users will find all the familiar and useful features of the fifth edition as well as significant updates and corrections. Works are organized alphabetically by composer and title, containing information on duration, instrumentation, date of composition, publication, movements, and special accommodations, if any. Individual appendices make it easy to browse works with chorus, solo voices, or solo instruments. Other appendices list orchestral works by instrumentation and duration as well as works intended for youth concerts. Also included are significant anniversaries of composers, composer groups for thematic programming, a title index, an introduction to Nieweg charts, essential bibliography, internet sources, institutions, and organizations, and a directory of publishers necessary for the orchestra professional. This trusted work, used around the globe, is a must-have for orchestral professionals, whether conductors or orchestra librarians, administrators involved in artistic planning, music students, considering orchestral conducting, authors of program notes, publishers, and music dealers, and instructors of conducting.

Nobody's Business Brian M. Reed, 2013-08-15 Since the turn of the new millennium English language verse has entered a new historical phase but explanations vary as to what has actually happened and why What might constitute a viable avant garde poetics in the aftermath of such momentous developments as 9 11 globalization and the financial crisis Much of this discussion has taken place in ephemeral venues such as blogs e zines public lectures and conferences Nobody's Business is the first book to treat the emergence of Flarf and Conceptual Poetry in a serious way In his engaging account Brian M Reed argues that these movements must be understood in relation to the proliferation of digital communications technologies and their integration into the corporate workplace Writers such as Andrea Brady Craig Dworkin Kenneth Goldsmith Danny Snelson and Rachel Zolf specifically target for criticism the institutions skill sets and values that make possible the smooth functioning of a postindustrial globalized economy Authorship comes in for particular scrutiny how does writing a poem differ in any meaningful way from other forms of content providing While often adept at using new technologies these writers nonetheless choose to explore anachronism ineptitude and error as aesthetic and political strategies The results can appear derivative tedious or vulgar they can also be stirring compelling and even sublime As Reed sees it this new generation of writers is carrying on the Duchampian practice of generating antiart that both challenges prevalent definitions of art and calls into question the legitimacy of the institutions that define it The
