Questioning Numbers How To Read And Critique Research:

Questioning Numbers Karin Gwinn Wilkins, 2011 *Questioning Numbers How to Read and Critique Research* is a critical companion for students in research methods courses in any of the social sciences. This book helps teach students how to read and critique research that employs numbers in the course of empirical argument. Author Karin Gwinn Wilkins provides a list of guidelines for reading research and also presents a critical approach to judging and using numbers in navigating and changing social worlds. Illuminating the agendas and politics that can inform how research is conducted and interpreted, this text shows readers how to read and critique research contexts, research design, sampling strategies, definitions, research implementation, data analysis, and interpretation. It also provides strong pedagogical support including key terms, review exercises, and end of chapter reflection questions. A flexible supplement to more comprehensive research texts, *Questioning Numbers* helps students to become more critical consumers and producers of quantitative research across the social sciences.

The Routledge Companion to Global Popular Culture Toby Miller, 2014-12-05 Research on popular culture is a dynamic, fast-growing domain. In scholarly terms, it cuts across many areas including communication studies, sociology, history, American studies, anthropology, literature, journalism, folklore, economics, and media and cultural studies. *The Routledge Companion to Global Popular Culture* provides an authoritative, up-to-date, intellectually broad, internationally aware, and conceptually agile guide to the most important aspects of popular culture scholarship. Specifically, this Companion includes interdisciplinary models and approaches for analyzing popular culture, wide-ranging case studies, discussions of economic and policy underpinnings, analysis of textual manifestations of popular culture, examinations of political, social, and cultural dynamics, and discussions of emerging issues such as ecological sustainability and labor. Featuring scholarly voices from across six continents, *The Routledge Companion to Global Popular Culture* presents a nuanced and wide-ranging survey of popular culture research.

Communication in International Development Florencia Enghel, Jessica Noske-Turner, 2018-05-23 International development stakeholders harness communication with two broad purposes: to do good via communication for development and media assistance, and to communicate 'do gooding' via public relations and information. This book unpacks various ways in which different efforts to do good are combined with attempts to look good 'be it in the eyes of donor constituencies at large or among more specific audiences such as journalists or intra-agency decision makers'. Development communication studies have tended to focus primarily on interventions aimed at doing good among recipients at the expense of examining the extent to which promotion and reputation management are elements of those practices. This book establishes the importance of interrogating the tensions generated by overlapping uses of communication to do good and to look good within international development cooperation. The book is a critical text for students and scholars in the areas of development communication and international development, and will also appeal to practitioners working in international aid who are directly affected by the challenges of communicating for and about development.

Communicating for Change Jo Tacchi, Thomas Tufte, 2020-07-10 This book offers a fresh set of innovative and creative contributions related to the role of communication in processes of change Given the current fast pace of social economic political and technological change across the globe and the central role of communication in this there is a growing need to reconceptualize how we approach communication and change that provides entry points to help us expand and enrich our scholarly and practical work This collection presents 14 concepts from a multi disciplinary collection of internationally leading and emerging scholars from 13 countries on 5 continents They come together around three meta topics citizenship and justice critiques of development and renewing thought from and for the margins The short chapter format ensures that authors get straight to the nub of their ideas providing readers students scholars and practitioners alike with accessible engaging and innovative ways to think critically about communication and social change in new ways
