
II. Einsteins Theory of Relativity

Hermann Minkowski (1864-1909)

German physicist - answer Henceforth space by itself, and time by itself, are doomed to fade away into mere shadows, and only a kind of union of the two will preserve an independent reality.

Albert Einstein - answer He theorized that time and distance can not be measured absolutely.

They only have meaning when they are measured relative to something.

Einsteins Theory: Two Step - answer Special theory of relativity:

(1905) how space and time are interwoven.

General Theory of Relativity:

(1915) Effects of gravity on space & time.

What is "relative" in Relativity? - answer Motion... All motion is relative.

Measurements of motion (and space and time) make no sense unless we are told what they are being measured relative to.

What is absolute in Relativity? - answer The laws of nature are the same for everyone.

The speed of light (in a vacuum, C , is the same for everyone

C = Speed of light

What is Relative? - answer Seeing something move is seen from the point of view.

Seeing something that you know is moving but its going the opposite direction of something else will be seen as static while the bigger object rotates.

Paradox - answer Is a situation that seems to violate common sense or contradict itself.

The paradox is resolved when the rules of nature are better understood.

The "UP" Paradox - answer Children: Regard "UP" as a single direction with us as the center.

Adults: "UP" is defined relative to center of the Earth.

Reference Frames - answer Two or more objects which do not move relative to each other share the same reference frame.

Questions and Answers F. Kiefer, 2012-12-06 In almost all principled accounts of questions questions are related to the corresponding answers Zellig Harris Harris 1978 1 for example maintains that all interrogative sentences can be derived by means of the independently established transformations of the language from sentences which assert that someone is asking about a disjunction of statements which are the relevant possible answers to that interrogative This amounts to the claim that a yes no question such as Will John stay is derived from I ask you whether John will stay and a wh question such as Who came is derived from something like I ask you whether A came or B came or or X came Though in generative grammar interrogatives are not derived from the corresponding declaratives the semantic interpretation of questions is akin to the syntactic source of questions posited by Harris Jerrold J Katz and Paul M Postal Katz Postal 1964 113 117 state a reading rule for Q the interrogative constituent which boils down to 1 in the case of yes no questions and to 2 in the case of wh questions 1 Tell me which of the following is true John will stay or John will not stay 2 Tell me which of the following is true A came or B came or or X came Thus the semantic interpretation of questions makes reference to the set of possible answers represented here by a disjunction of statements A Question and Answer Guide to Astronomy Pierre-Yves Bely, Carol
