Online Archaeology American Experience Archaeological Perspective:

The Contemporary Archaeology of Emotions: Re-Framing the Past and Present Tuuli Matila, 2025-09-30 This SpringerBrief examines emotions in the past through contemporary archaeological materials The author explores this topic using the context of a former working class neighbourhood in northern Finland that existed during the Cold War era 1947 1987 Finland offers an interesting context to examine this because of the twofold emotional frames the Cold War and capitalism versus the nascent welfare state The push and pull between the values emphasizing universal care and compassion against the hardline militarisation and financial competition results in accessing different and sometimes contradictory emotions It also affords a gendered view into the past and such an angle could be attempted in the context of the deep past as well This book offers several examples on how emotions could be accessed in the deep past and draws parallels between the examples from a contemporary western country and various archaeological cultures and contexts Emotions can be a bridge to access the secrets of human behavior Such bridging is the core strength of archaeological education but rarely are emotions acknowledged in the process Lastly this book underlines the role of emotions specifically empathy in archaeological education and in destabilizing contemporary political notions on social norms and contracts

Tourism, Memorials and Landscapes of Violence Rudi Hartmann, 2024-09-30 The book focuses on tourism memorial sites of the Holocaust and the Pacific War and the management practices for the visitors that they attract It provides an account of landscapes of violence as millions of people in Central and Eastern Europe China Japan and the United States were affected by wars conflicts and crises A special feature of the book is to reconstruct the changing management practices and the significance these heritage sites have attained for different visitor groups and the local populations and to critically assess the current situation 80 years after the events The book discusses the new directions of dark tourism thanatourism and dissonance in heritage tourism in contemporary tourism research Several case studies and in depth analysis of memorial sites allow the reader to understand the consequences of past or ongoing policy changes This book will appeal to students and researchers in the fields of tourism heritage history cultural studies anthropology and human geography

Creating Participatory Dialogue in Archaeological and Cultural Heritage Interpretation: Multinational Perspectives John H. Jameson, Sherene Baugher, 2022-02-28 This volume examines evolving trends and transnational perspectives on public interpretation of archaeological and cultural heritage as well as levels of communication from local to regional national and international It is presented in the context of the evolution of cultural heritage studies from the 20th century expert approach to the 21st century people centered approach with public participation and community involvement at all phases of the decision making process Our premise is not just about bringing in community members to be partners in decision making processes some projects are being initiated by the community not the heritage experts In some instances community members are central in initiating and bringing about change rather than the archaeologists or heritage specialists In several

cases in the book descendants take the lead in changing heritage narratives The book addresses several central questions Do these actions represent new emphases or more fundamental pedagogical shifts in interpretation Are they resulting in more effective interpretation in facilitating emotional and intellectual connections and meanings for audiences Are they revealing silenced histories Can they contribute to or help mediate dialogues among a diversity of cultures Can they be shared experiences as examples of good practice at national and international levels What are the interpretation and presentation challenges for the future Cultural heritage as an expression of a diversity of cultures can be an important mediator between pasts and futures In the past people in power from the dominant ethnic racial socio economic gender and religious groups determined the heritage message Minorities were often silenced their participation in the building and growth of a city county or nation s history was overlooked New philosophical methodological trends in public interpretation are reshaping the messages delivered at archaeological cultural heritage sites worldwide The role of the experts as well as the participatory engagement of audiences and stakeholders are being redefined and reassessed This book explores these processes their results and effects on the future

Archaeological Theory and the Politics of Cultural Heritage Laurajane Smith,2004-08-02 This controversial book is a survey of how relationships between indigenous peoples and the archaeological establishment have got into difficulty and a crucial pointer to how to move forward from this point With lucid appraisals of key debates such as NAGPRA Kennewick and the repatriation of Tasmanian artefacts Laurajane Smith dissects the nature and consequences of this clash of cultures Smith explores how indigenous communities in the USA and Australia have confronted the pre eminence of archaeological theory and discourse in the way the material remains of their past are cared for and controlled and how this has challenged traditional archaeological thought and practice Essential reading for all those concerned with developing a just and equal dialogue between the two parties and the role of archaeology in the research and management of their heritage

Historical Archaeology Through a Western Lens Mark Warner,Margaret Purser,2017-06 A 2017 Choice Outstanding Academic Title The mythic American West with its perilous frontiers big skies and vast resources is frequently perceived as unchanging and timeless The work of many western based historical archaeologists over the past decade however has revealed narratives that often sharply challenge that timelessness *Historical Archaeology Through a Western*

Lens reveals an archaeological past that is distinct to the region but not in ways that popular imagination might suggest. Instead this volume highlights a western past characterized by rapid and ever changing interactions between diverse groups of people across a wide range of environmental and economic situations. The dynamic and unpredictable lives of western communities have prompted a constant challenging and reimagining of both individual identities and collective understandings of their position within a broader national experience. Indeed the archaeological West is one clearly characterized by mobility rather than stasis. The archaeologies presented in this volume explore the impact of that pervasive human mobility on the West: a world of transience, impermanence, seasonal migration and accelerated trade and technology at scales ranging from the local to the global. By documenting the challenges of both local community building and global networking they provide an archaeology of the West that is ultimately from the West.

The Great Museum of the Sea James P. Delgado, 2025-06-03 An immersive dive into the meaning and mystique of shipwrecks. The sea is the largest museum on earth with more than a million lost ships resting in its depths. Those shipwrecks date back thousands of years, some from civilizations long vanished, others from more recent history. Some are famous, others obscure and unremembered, but each has a story to tell. In *The Great Museum of the Sea*, archaeologist, museum director, television host, journalist and award winning author James Delgado takes the reader on a personal tour of the world's wrecks, including many of the more than a hundred lost ships he has personally discovered and investigated, including the Titanic, USS Arizona, and the slave ship Clotilda. *The Great Museum of the Sea* vividly explains how and why ships experience catastrophe at sea and why their remains have captured our imagination for millennia. Shipwrecks engage us in many ways: we treat them as tombs, but also recover them for museums and memorials, and salvage them for treasure. Authoritative and informed by decades of shipwreck expeditions, Delgado's account offers an insider's perspective, taking the reader into the deep and behind the scenes.

Daisy Wheel, Hexfoil, Hexafoil, Rosette Robyn S. Lacy, 2024-09-01 The use of protective symbols, also known as apotropaic marks, are often part of folk magic traditions appearing in homes, churches, on personal items, and even graves across Europe, Australia, and North America. The most common and well known of these marks is the hexfoil, otherwise known as the daisy wheel, witch hex, or rosette. Hexfoils have a history of use for personal protection and were carved both intentionally or graffitied into church pews and walls, bed frames, doors, and gravestones. This research sheds light on the use of this historic symbol to protect the bodies and souls of the deceased across several thousand years and multiple countries.

Archaeology in America Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet. The American past, the people, battles, industry, and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care. These sites are not in distant lands accessible only by research scientists but nearby; almost every locale possesses a parcel of land worthy of archaeological exploration. *Archaeology in America* is the first resource that provides students, researchers, and anyone interested in their local history with a survey of

the most important archaeological discoveries in North America. Leading scholars, most with an intimate knowledge of the area, have written in-depth essays on over 300 of the most important archaeological sites that explain the importance of the site, the history of the people who left the artifacts, and the nature of the ongoing research. Archaeology in America divides its coverage into 8 regions: the Arctic and Subarctic, the Great Basin and Plateau, the Great Plains and Rocky Mountains, the Midwest, the Northeast, the Southeast, the Southwest, and the West Coast. Each entry provides readers with an accessible overview of the archaeological site, as well as books and articles for further research.
