Elemental Ecocriticism Jeffrey Jerome Cohen, Lowell Duckert, 2015-12-23 For centuries it was believed that all matter was composed of four elements earth air water and fire in promiscuous combination bound by love and pulled apart by strife Elemental theory offered a mode of understanding materiality that did not center the cosmos around the human Outgrown as a science the elements are now what we build our houses against Their renunciation has fostered only estrangement from the material world The essays collected in Elemental Ecocriticism show how elemental materiality precipitates new engagements with the ecological Here the classical elements reveal the vitality of supposedly inert substances mud water earth air chemical processes fire and natural phenomena as well as the promise in the abandoned and the unreal ether phlogiston spontaneous generation Decentering the human this volume provides important correctives to the idea of the material world as mere resource Three response essays meditate on the connections of this collaborative project to the framing of modern day ecological concerns A renewed intimacy with the elemental holds the potential of a more dynamic environmental ethics and the possibility of a reinvigorated materialism **How Water Makes Us Human** Luci

Attala, 2019-04-01 This book provides a novel cross disciplinary approach to water demonstrating the role water plays in shaping human lives It uses anthropological information about water in Kenya Wales and Spain to show how what water does in those areas has influenced the way that people can be with it *The Elements in the Medieval World*, 2024-11-18 The fourteen chapters and poem of this volume reflect the centrality of the element Earth in medieval thought and life a centrality inherited from classical antiquity and fundamental too in Judaeo Christian and Islamic traditions The chapters also reflect the multifarious nature of the ways that Earth was experienced and understood in the Middle Ages Contributors are Sophie E D Abrahams Daniel Anlezark Marilina Cesario Catherine Clarke James Davis Stephen J Davis Virginia Iommi Echeverri Andrew Fear Danielle B Joyner Hugh Magennis Francesco Marzella Tom C B McLeish Patrick Naeve Bernard O Donoghue Sin ad O Sullivan Alexandra Paddock Elisa Ramazzina Hannah E Smithson Sigbjørn O Snesyn Sin ad O Sullivan and Margaret Tedford *The Ecology of American Noir* Katrina Younes, 2025-04-07 This volume investigates the relationship between the conventions of noir fiction and film and its sub types in relation to environmental crises Dr Younes addresses questions that not only allow readers to re read early hardboiled literature and neo noir films but also help identify a new sub genre of noir and develop an ecocritical methodology eco noir This text traces the development of strategies of mapping urban blight and environmental deterioration in classic hardboiled fiction of the 1940s neo noir films of the 1970s and eco noir texts of the post millennial period Introducing the concept of eco noir as both a sub genre and fictional form as well as a methodology the volume develops a new way of understanding the relationship between noir and climate fiction texts Through a close reading of hardboiled neo noir and eco noir texts including those by Dashiell Hammett Raymond Chandler Robert Towne Kim Stanley Robinson and Jeff VanderMeer it asks and addresses the question how does each sub genre of

noir map the noir atmosphere of the private investigator's natural setting in terms of environmental toxicity The Ecology of American Noir contributes to critical conversations in both noir and ecocritical scholarship making clear how a new understanding of noir as defined through environmental and atmospheric conditions invites readers viewers and scholars of the genre to generate meaningful dialogues about our decaying and deteriorating environment

Elemental Encounters in the Contemporary Irish Novel Claire McGrail Johnston, 2019-12-19 The underlying premise of this book is that reading is touching Words leap out of their beds and pierce flesh like a knife Storytelling breathes within the dynamic of encounters with air fire earth and water permeated by emotion imagination and touch These ideas are contextualized within ancient community rituals social justice gatherings pedagogical practices and map making The four elements are retrieved from exile as imaginative corporeal and generative substances that operate within stories like medicine bundles Reading becomes a Deleuzian enterprise of health a challenging experience that grasps Paulo Freire's generative themes and is simultaneously thought provoking and valuable The capacious literary space capable of housing this sensual ferment is the novel More verb than noun the novel is an elemental bundle that engages with flesh in all its manifestations This book spotlights Irish novels by John Banville and Mary Morrissy exploring how they revitalise the elements with sensual social and tactile textures

The Anthropocene Eva Horn,Hannes Bergthaller,2019-09-11 The Anthropocene is a concept which challenges the foundations of humanities scholarship as it is traditionally understood It calls not only for closer engagement with the natural sciences but also for a synthetic approach bringing together insights from the various subdisciplines in the humanities and social sciences which have addressed themselves to ecological questions in the past This book is an introduction to and structured survey of the attempts that have been made to take the measure of the Anthropocene and explores some of the paradigmatic problems which it raises The difficulties of an introduction to the Anthropocene lie not only in the disciplinary breadth of the subject but also in the rapid pace at which the surrounding debates have been and still are unfolding This introduction proposes a conceptual map which however provisionally charts these ongoing discussions across a variety of scientific and humanistic disciplines This book will be essential reading for students and researchers in the environmental humanities particularly in literary and cultural studies history philosophy and environmental studies Beyond Elemental

Loss Marjolein Oele,2025-04-01 Offers an important and innovative contribution to environmental philosophy by investigating loss in times of anthropogenic climate change through the elements of water fire air and earth Beyond Elemental Loss offers an important and innovative contribution to environmental philosophy by investigating loss in times of anthropogenic climate change through the elements of water fire air and earth Marjolein Oele argues that the current experience of loss prompts a reassessment of the conventional meaning and conceptualization of loss She proposes that such loss is best understood through infinitesimal diachronic shifts occurring in the elemental constellations that structure the world water fire air and earth and humanity s incremental inability to cognitively and affectively make sense of this world increasingly transformed by anthropogenic forces Through a generous yet critical reading of a broad range of interdisciplinary sources tracing changes in our relationship to the elemental over time Oele s scholarship plumbs the history of philosophy as much as it pulls from Indigenous philosophies continental thought mythologies anthropological and historical sources science and ecology The book s argumentative arc ultimately directs our attention toward constructive transformations in our cognitive and affective habits and it argues that trust can bring us beyond elemental loss **Toni**

Morrison and the Natural World Anissa Janine Wardi,2021-06-28 Winner of the Toni Morrison Society Book Prize for Best Single Authored Book 2019 2022 Critics have routinely excluded African American literature from ecocritical inquiry despite the fact that the literary tradition has from its inception proved to be steeped in environmental concerns that address elements of the natural world and relate nature to the transatlantic slave trade plantation labor and nationhood Toni

Morrison's work is no exception Toni Morrison and the Natural World An Ecology of Color is the first full length ecocritical investigation of the Nobel Laureate's novels and brings to the fore an unequalled engagement between race and nature Morrison's ecological consciousness holds that human geographies are enmeshed with nonhuman nature It follows then that ecology the branch of biology that studies how people relate to each other and their environment is an apt framework for this book The interrelationships and interactions between individuals and community and between organisms and the biosphere are central to this analysis They highlight that the human and nonhuman are part of a larger ecosystem of interfacing and transformations Toni Morrison and the Natural World is organized by color examining soil brown in *The Bluest Eye* and *Paradise* plant life green in *Song of Solomon* *Beloved* and *Home* bodies of water blue in *Tar Baby* and *Love* and fire orange in *Sula* and *God Help the Child* By providing a racially inflected reading of nature Toni Morrison and the Natural World makes an important contribution to the field of environmental studies and provides a landmark for Morrison scholarship

Cosmological Readings of Contemporary Australian Literature Kathrin Bartha-Mitchell, 2023-12-22 This book presents an innovative and imaginative reading of contemporary Australian literature in the context of unprecedented ecological crisis The Australian continent has seen significant rapid changes to its cultures and land use from the impact of British colonial rule yet there is a rich history of Indigenous land ethics and cosmological thought By using the age old idea of cosmos the order of the world to foreground ideas of a good order and chaos reciprocity and more than human agency this book interrogates the Anthropocene in Australia focusing on notions of colonisation farming mining bioethics technology environmental justice and sovereignty It offers cosmological readings of a diverse range of authors Indigenous and non Indigenous as a challenge to the Anthropocene's decline narrative As a result it reactivates cosmos as an ethical vision and a transculturally important counter concept to the Anthropocene Kathrin Bartha Mitchell argues that the arts can help us envision radical cosmologies of being in and with the planet and to address the very real social and environmental problems of our era This book will be of particular interest to scholars and students of Ecocriticism Environmental Humanities and postcolonial transcultural and Indigenous studies with a primary focus on Australian New Zealand Oceanic and Pacific area studies
