Military Design Thinking Aaron P. Jackson, 2024-09-30 This book examines the newly emergent field of military design thinking how it has been developed inside and outside of military doctrine and the paradigms that underlie its key thinkers and methodologies From the emergence of its initial methodologies in the late 1990s military design thinking's development rapidly accelerated in the mid 2000s in response to perceived

failures of existing military doctrine and practice to adapt to the wars of the early 21st century To establish a foundation for exploring the significance of the challenge military design thinking presented to dominant approaches to warfare the early chapters in the book examine the ontology and epistemology of military doctrine which is defined as a written expression of a military's institutional belief system regarding how to wage war They also explain how attempts to incorporate military design thinking into doctrine ultimately led to its assimilation into this belief system requiring military design thinkers to continue to explore and develop the field outside of doctrine Since the mid 2010s non doctrinal military design methodologies have become increasingly prominent within several Western militaries including the US Canada UK Australia and several European militaries Later chapters offer an exploration of the paradigms underlying non doctrinal as well as doctrinal design methodologies This book highlights how the field has evolved shows how military design thinking differs from its civilian equivalents developed in fields such as commerce and business management and discusses how it may evolve in the near future This book will be of much interest to students of military studies security studies and international relations as well as to military professionals

Selecting and Implementing Technologies in Libraries Tod Colegrove, 2022-09-14 New technology and services are fundamental to maintaining the relevance of libraries today but which technologies and or services make sense to implement and which to avoid Building from a framework drawn in the overlap of design thinking with best practices in emerging technology and library practice this book is a go to guide for the active library practitioner and LIS student alike From the 3D printers and laser cutters of today's library makerspace to collection development and library outreach this primer offers clear examples that illustrate the practical and collaborative approach that ensures alignment and increases the likelihood of success Written as a textbook for LIS students in the crossover areas of emerging technology design thinking and library management the book will also meet the needs of the active library practitioner in public academic and special libraries both those new to the field and seasoned professionals The practical treatment and examples provided will be of interest and immediate use Questions at the end of each chapter give readers an opportunity to think about the concepts presented The book is also designed to let the enduring values of librarianship and library practice shine through guiding the reader to navigate the future of library technology
