Modern North Architecture On The Frozen Edge:

Modern North Julie Decker, 2010-03-31 The Geographic Region Around the North Pole is a Raw and Exotic Area of Untouched Nature and Inescapable Beauty Building in this extremely cold climate requires an advanced degree of ingenuity and resolve Ecological conditions including high winds snowdrifts and permafrost combined with periods of little sunlight present seemingly impossible logistical hurdles for architects Vernacular buildings have emerged but like most indigenous structures they do little more than simply enclose and protect Recent years have witnessed an explosion of exceptional new architecture and a new definition of a Northern building one that is both extraordinarily responsive to place and aesthetically provocative In *Modern North Architecture on the Frozen Edge* author Julie Decker presents thirty four of the most compelling and far ranging possibilities of contemporary architecture in the North These buildings located in northern Canada Scandinavia and Alaska are united in the way they embrace extreme conditions and provide visual stimulation in places that sometimes offer little more than a whitescape The book contains innovative structures by both established and up and coming architects including David Chipperfield Architects Studio Granda and Shim Sutcliffe Architects as well as essays by Brian Carter Juhani Pallasmaa Edwin Crittenden and Lisa Rochon that place the projects in the context of a new architectural response to the North **BOOK JACKET** *Design and the Built Environment of the Arctic* Leena Cho, Matthew

Adaptive Architecture Wolfgang F. E. Preiser,Andrea E. Hardy,Jacob J. Wilhelm,2017-09-01 The constant in architecture s evolution is change Adaptive Architecture explores structures or environments that accommodate multiple functions at the same time sequentially or at periodically recurring events It demonstrates how changing technological economic ecological and social conditions have altered the playing field for architecture from the design of single purpose structures to the design of interacting systems of synergistically interdependent distributed buildings Including contributors from the US UK Japan Australia Germany and South Africa the essays are woven into a five part framework which provides a broad and unique treatment of this important and timely issue

Competing Arctic Futures Nina Wormbs,2018-08-06 This edited collection explores how narratives about the future of the Arctic have been produced historically up until the present day The contemporary deterministic and monolithic narrative is shown to be only one of several possible ways forward This book problematizes the dominant prediction that there will be increased shipping and resource extraction as the ice melts and shows how this seemingly inevitable future has consequences for the action that can be taken in the present This collection looks to historical projections about the future of the Arctic evaluating why some voices have been heard and championed while others remain marginalised It questions how these historical perspectives have shaped resource allocation and governance structures to understand the forces behind change in the Arctic region Considering the history of individuals and institutions their political and economic networks and their perceived power the essays in this collection offer newperspectives on how the future of

the Arctic has been produced and communicated *Modern Finland* Harald Haarmann, 2016-10-03 Providing a multifaceted view of modern Finland this book describes its history culture language geography natural history and the mythology of early peoples Topics include Fenno Scandia inhabitants and their environment traditional naturalism and modern environmentalism and the salient features of Finnishness including an analysis of the Finnish educational system and gender equality Finland's art architecture and music are highlighted along with its peace keeping missions worldwide The country's several ethnic groups and their languages are discussed the Saami Finns Finland Swedes Russian speaking peoples Jews and Gypsies The author examines Finland's late but rapid development in commerce and industry with a focus on the history of Nokia Corporation which grew from a 19th century manufacturer of pulpwood and rubber boots to a 21st century international digital communications company **Choice** ,2009 HUD Challenge United States.
