Fiat Money— something that serves as money but has no other value or uses (paper money, coins, digital currency)

4. What are stocks and bonds?

Bonds are loans that represent debt that the government or business must repay to a lender

- they have a term (ex 10 years), a set interest rate (ex 5%), and consist of regular payments to the lender

- a. Required Reserves— the percent of the demand deposits that banks must hold by law (ex if I deposit \$100 and the RR is 10%, the bank must hold on to \$10)

- b. Excess Reserves— the amount of money that the bank can loan out in loans (from the same example above, if the bank must hold on to \$10, they can loan out \$90)

Macroeconomics (With Study Guide Cd-rom) Jagdish Handa,2010-09-24 This book presents the stylized facts on the important variables output inflation money supply and interest rates etc of the macro economy and uses them to differentiate how well particular economic theories perform or fail to do so On the determination of aggregate demand this book presents two approaches the traditional IS LM analysis under the assumption that the money supply is exogenous because the central bank uses its monetary policy to control it and the emerging IS IRT analysis under the assumption that the interest rate is the exogenous monetary policy variable set by the central bank to manipulate aggregate demand in the economy The IS IRT analysis is important for the macro analyses of many economies yet is totally neglected in most textbooks on macroeconomics The chapter on Paradigms in Economics introduces students to the heritage of ideas in macroeconomics and the evolution of ideas and approaches over the last two centuries It also provides the justification for the simultaneous relevance of both Classical ideas and Keynesian ones The two growth theory chapters go beyond the Solow growth model to cover the broad evolution of growth from Malthus s theory to the present endogenous approaches and the link between money supply inflation and growth over very long periods
