Monkey Taming Judith Fathallah:

Monkey Taming Judith Fathallah, 2015-05-29 You've eaten too much you fat pig When Jessica was thirteen years old she met the Monkey The Monkey lived inside her a driving fiery voice telling her that thinness was the only way The only way to be safe to be good to be acceptable and above all to escape from the cold looming threat of approaching adulthood Jessica listened to the Monkey and it consumed her This is the illuminating story of a teenage girl's wanderings in darkness the spiral down into madness the terrible realities of an adolescent psychiatric unit and the stark choice that she must either tame her monster or die Through memory reflection and enduring black humour Jessica makes a tenuous peace with the world and with her emerging adult self

Cognitive Literary Science Michael Burke, Emily Troscianko, 2017 This book brings together researchers with cognitive scientific and literary backgrounds to present innovative research in all three variations on the possible interactions between literary studies and cognitive science The tripartite structure of the volume reflects a more ambitious conception of what cognitive approaches to literature are and could be than is usually encountered and thus aims both to map out and to advance the field The first section corresponds to what most people think of as cognitive poetics or cognitive literary studies the study of literature by literary scholars drawing on cognitive scientific methods findings and/or debates to yield insights into literature The second section demonstrates that literary scholars needn't only make use of cognitive science to study literature but can also in a reciprocally interdisciplinary manner use a cognitively informed perspective on literature to offer benefits back to the cognitive sciences Finally the third section literature in cognitive science showcases some of the ways in which literature can be a stimulating object of study and a fertile testing ground for theories and models not only to literary scholars but also to cognitive scientists who here engage with some key questions in cognitive literary studies with the benefit of their in-depth scientific knowledge and training
