This book consists of two essays on new approaches for the Arbitrage Pricing Theory and the Present Value Model and one essay on cross sectional correlations in panel data The new approaches are designed to study a large number of securities over time They can be employed by security analysts to discover market anomalies without assuming observable factors or constant risk premium The book shows how these two approaches can be used to determine how many systematic factors affect the U S stock market Modern Methods of Valuation of Land, Houses and Buildings William Britton,1971

Modern Methods of Valuation of Land, Houses and Buildings David Malcolm Lawrance,Harold G. May,1943

Design Rules, Volume 2 Carliss Y. Baldwin,2024-12-17 How the innate physical properties of different technologies influence the strategy and structure of the organizations implementing the technologies the sequel to Design Rules The Power of Modularity In Design Rules volume 2 Carliss Baldwin offers a comprehensive view of the digital economy by putting forth an original theory that explains how technology shapes organizations in a market economy The theory claims that complementarities arising from the physical nature of technologies can be arrayed on a spectrum ranging from strong to very weak Two basic types of technologies in turn exhibit different degrees of complementarity between their internal components Flow production technologies which are found in steel mills and auto factories specify a series of steps each of which is essential to the final product In contrast platform technologies which are characteristic of computer hardware software and networks are modular systems designed to provide options Baldwin then investigates the dynamics of strategy for firms in platform ecosystems Such firms create value by solving technical bottlenecks technical barriers to performance that arise in different parts of the system as it evolves They capture value by controlling and defending strategic bottlenecks components that are 1 essential to the functioning of some part of the system 2 unique and 3 controlled by a profit seeking enterprise Strategic bottlenecks can be acquired by solving technical bottlenecks They can be destroyed via tactics such as substitution reverse engineering bypassing the bottleneck and enveloping a smaller bottleneck within a larger one Strategy in platform ecosystems can thus be viewed as the effective management of technical and strategic bottlenecks within a modular technical system **Modern Methods of Valuation of Land, Houses and Buildings** David Malcolm Lawrence,William

Hurst Rees,W. Britton,1964 **Modern Methods of Valuation of Land, Houses and Buildings** Tony Johnson,Keith Davies,Eric Shapiro,2000 The object of the book remains as it was for the first edition the authors have combined a detailed study of the principles governing the valuation of land and buildings with an account of the application of those principles to everyday problems met within practice and the ever changing legal framework has been updated
