Volume III has been derived from the work of several professors in the nuclear and power industry all of whom have been directly involved with the industry as managers or consultants The text has been written as educational material and many of the individual chapters have been written as course material for advanced university courses Also several chapters include

material related to plant operation which is prescribed for operator training Hence it bridges the gap between academic study and practical training While it is not intended to be comprehensive in all respects it does provide an overview of the topic with sufficient technical depth for a general understanding of power plant technology and a basis for further study in a particular area When used as a reference in this way each chapter can stand alone and be read independently of the others Overall it meets the general philosophy of EOLSS in providing a source of knowledge for sustainable development and technological progress for educators and decision makers
