

Consumer Information

Faucets made of leaded brass alloys may contribute small amounts of lead to water that is allowed to stand in contact with the brass. The amount of lead contributed by any faucet is highest when the faucet is new. The following steps may reduce potential exposure to lead from faucets and other parts of the plumbing system:

- Always run the water for a few seconds prior to use for drinking or cooking.
- Use only cold water for drinking or cooking.
- If you are concerned about lead in your water, have your water tested by a certified laboratory in your area.

Información al consumidor

Las llaves mezcladoras fabricadas con aleaciones de cobre con plomo pueden arrojar pequeñas cantidades de plomo al agua que queda en contacto con el bronce, las cuales son mayores cuando la llave está nueva. Los siguientes pasos le ayudarán a reducir la posible exposición al plomo originada por las llaves y otras piezas del sistema de plomería.

- Deje correr el agua durante unos segundos antes de usarla para beber o cocinar.
- Utilice sólo agua fría para beber o cocinar.
- Si está preocupado por la cantidad de plomo que pudiera haber en el agua, lívela a examinar a algún laboratorio local certificado.

Renseignements pour les consommateurs

Les robinets fabriqués à partir d'alliages de laiton et de plomb pourraient ajouter de petites quantités de plomb à l'eau si celle-ci était stagnante et qu'elle touchait au laiton. La quantité de plomb ajoutée par tout robinet est plus élevée lorsque le robinet est nouveau. Les directives suivantes peuvent aider à réduire l'exposition au plomb provenant du robinet et d'autres parties de la tuyauterie :

- Toujours faire couler l'eau pendant quelques secondes avant de s'en servir pour boire ou cuire.
- Utiliser uniquement de l'eau froide pour boire ou cuire.
- Si la quantité de plomb dans votre eau vous inquiète, la faire tester par un laboratoire local certifié.
