Molecular Typing In Bacterial Infections Infectious Disease:

Molecular Typing in Bacterial Infections, Volume I Ivano de Filippis, 2022 This updated second edition of *Molecular Typing in Bacterial Infections* presented in two volumes covers both common and neglected bacterial pathogenic agents highlighting the most effective methods for their identification and classification in the light of their specific epidemiology. New chapters have been included to add new species as well as another view of how bacterial typing can be used. These books are valuable resources for the molecular typing of infectious disease agents encountered in both research and hospital clinical laboratory settings as well as in culture collections and in the industry. Each of the 21 chapters provides an overview of specific molecular approaches to efficiently detect and type different bacterial pathogens. The chapters are grouped in five parts covering respiratory and urogenital pathogens Volume I and gastrointestinal and healthcare associated pathogens as well as a new group of vector borne and Biosafety level 3 pathogens including a description of typing methods used in the traditional microbiology laboratory in comparison to molecular methods of epidemiology Volume II. Comprehensive and updated *Molecular Typing in Bacterial Infections* provides state of the art methods for accurate diagnosis and for the correct classification of different types which will prove to be critical in unravelling the transmission routes of human pathogens.

Molecular Typing in Bacterial Infections Ivano de Filippis, Marian L. McKee, 2012-11-07 *Molecular Typing in Bacterial Infections* covers common bacterial pathogenic agents with the most effective methods for their identification and classification in the light of their specific epidemiology. The book will be a valuable resource for molecular typing of infectious diseases agents encountered in both the research and hospital clinical lab settings as well as culture collections. Each chapter provides an overview of molecular approaches to typing bacterial pathogens. Part I gives a general overview of typing methods used in the traditional microbiology laboratory in comparison to molecular methods of epidemiology. In Part II the relative strengths and weaknesses of the different methods applicable to the specific agents of infectious diseases are emphasized. Specific emphasis is placed on recent changes and updates in molecular typing. *Molecular Typing in Bacterial Infections, Volume II* Ivano de Filippis, 2022 This updated second edition of *Molecular Typing in Bacterial Infections* presented in two volumes covers both common and neglected bacterial pathogenic agents highlighting the most effective methods for their identification and classification in the light of their specific epidemiology.
