The 1840 translation of the Gospel of Luke as a technology of power Itumeleng D. Mothoagae ,2024-07-26 In this book the author aims to explore the impact of 19th century translations of the Bible into indigenous languages with a specific focus on the Setswana translation The translations have had a profound effect on the religious cultural practices of the indigenous people leading to erosion and alteration of their traditions and identities I argue that it is crucial to consider the translator's intentions and the associated literature such as journals and letters to understand the translation process comprehensively The Setswana Bible was the first to be translated in Africa and tracing the intentions of Robert Moffat the first translator is imperative to understanding the impact of the translation on the receptor culture The methodology adopted is interdisciplinary drawing from linguistics African languages history English literature cultural studies black studies and theology I analyse the impact of the 1840 Gospel of Luke in the context of Setswana culture in South Africa and my findings demonstrate that translations cannot be distinct from the translator To gain a deep understanding of the implications of such texts I adopt a methodology that analyses significant historical literature and primary sources including the records and works of The British and Foreign Bible Society The History of the London Missionary Society and the journals letters and writings of missionaries such as Robert Moffat and John Campbell

Training for the New Millennium Martha Tennent,2005-01-01 Originating at an international forum held at the University of Vic Spain the twelve essays collected here attest to important changes in translation practice and the assumptions which underpin them Leading theorists respond to the state of Translation Studies today particularly the epistemological dilemma between theories that are empirically oriented and those that are inspired by developments in Cultural Studies But the volume is also practical Experienced instructors survey existing pedagogies at translator interpreter training programs and explore new techniques that address the technological and global challenges of the new millennium Among the topics considered are how to use translation technology in the classroom how to construct a syllabus for a course in audiovisual translating or in translation theory and how to develop guidelines for a program for community interpreters or conference interpreters The contributors all assume that translation whether written or oral does not occupy a neutral space It is a cross cultural exchange that produces far reaching social effects Their essays significantly advance the theoretical and practical understanding of translation along these lines

Translating Feminism in China Zhongli Yu,2015-06-05 This book explores translation of feminism in China through examining several Chinese translations of two typical feminist works The Second Sex TSS Beauvoir 1949 1952 and The Vagina Monologues TVM Enslin 1998 TSS exposes the cultural construction of woman while TVM reveals the pervasiveness of sexual oppression toward women The female body and female sexuality including lesbian sexuality constitute a challenge to the Chinese translators due to cultural differences and sexuality still being a sensitive topic in China

This book investigates from gender and feminist perspectives how TSS and TVM have been translated and received in China with special attention to how the translators meet the challenges. Since translation is the gateway to the reception of feminism, an examination of the translations should reveal the response to feminism of the translator as the first reader and gatekeeper and how feminism is translated both ideologically and technically in China. The translators' decisions are discussed within the social, historical, and political contexts. *Translating Feminism in China* discusses, among other issues, Feminist Translation Practice Theory and Studies, Translating the Female Body and Sexuality, Translating Lesbianism, Censorship, Sexuality and Translation. This book will be relevant to postgraduate students and researchers of translation studies. It will also interest academics interested in feminism, gender studies, and Chinese literature and culture. Zhongli Yu is Assistant Professor of Translation Studies at the University of Nottingham Ningbo, China. UNNC

Lexis and Creativity in Translation Dorothy Kenny, 2014-04-08. Computers offer new perspectives in the study of language, allowing us to see phenomena that previously remained obscure because of the limitations of our vantage points. It is not uncommon for computers to be likened to the telescope or microscope in this respect. In this pioneering computer-assisted study of translation, Dorothy Kenny suggests another image: that of the kaleidoscope. Playful changes of perspective using corpus processing software allow textual patterns to come into focus and then recede again as others take their place. And against the background of repeated patterns in a corpus, creative uses of language gain a particular prominence. In *Lexis and Creativity in Translation*, Kenny monitors the translation of creative source text word forms and collocations uncovered in a specially constructed German-English parallel corpus of literary texts. Using an abundance of examples, she reveals evidence of both normalization and ingenious creativity in translation. Her discussion of lexical creativity draws on insights from traditional morphology, structural semantics, and most notably, neo-Firthian corpus linguistics, suggesting that rumours of the demise of linguistics in translation studies are greatly exaggerated. *Lexis and Creativity in Translation* is essential reading for anyone interested in corpus linguistics and its impact so far on translation studies. The book also offers theoretical and practical guidance for researchers who wish to conduct their own corpus-based investigations of translation. No previous knowledge of German corpus linguistics or computing is assumed.
