Money Politics Globalisation And Crisis The Case Of Thailand:

Money Politics, Globalisation, and Crisis John Laird, 2000 **Energy, Governance and Security in Thailand and Myanmar (Burma)** Adam Simpson, 2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources Due to entrenched societal inequities and widespread authoritarian governance however the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations These effects are particularly evident in both Thailand and Myanmar Burma which located at the crossroads of Asia are increasingly engaged in the cross border energy trade Based on extensive fieldwork and theoretical analysis this ground breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing in the absence of effective and democratic governments in providing activist environmental governance for energy projects throughout the region By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South s natural resources Youth Culture and Identity in Northern Thailand Anjalee Cohen, 2020-06-02 Youth Culture and Identity in Northern Thailand examines how young people in urban Chiang Mai construct an identity at the intersection of global capitalism state ideologies and local culture Drawing on over 15 years of ethnographic research the book explores the impact of rapid urbanisation and modernisation on contemporary Thai youth focusing on conspicuous youth subcultures drug use especially methamphetamine use and violent youth gangs Anjalee Cohen shows how young Thai people construct a specific youth identity through consumerism and symbolic boundaries in particular through enduring rural urban distinctions The suggestion is that the formation of subcultures and deviant youth practices such as drug use and violence are not necessarily forms of resistance against the dominant culture nor a pathological response to dramatic social change as typically understood in academic and public discourse Rather Cohen argues that such practices are attempts to fit in and stick out in an anonymous urban environment This volume is relevant to scholars in Thai Studies Southeast Asian Studies Anthropology Sociology Urban Studies and Development Studies particularly those with an interest in youth drugs and gangs Democracy or Alternative Political Systems in Asia Hsin-Huang Michael Hsiao, 2014-01-10 From the 1980s onwards a tide of democratization swept across the Asian region as the political strongmen who had led since the end of World War II began to fall Although it is generally assumed that once authoritarian leaders no longer hold power the political landscape will drastically change and the democratic transition will simply be a matter of time this book shows that the move towards democracy in Asia has by no means been linear process and there have been a number of different outcomes that reflect the vastly divergent paths towards liberalization the Asian nations have followed

This book examines seven countries that were previously under authoritarian or semi authoritarian rule but then followed very different trajectories towards increasing liberalization after the fall of political strongmen South Korea Taiwan China the Philippines Indonesia Malaysia and Thailand Importantly the case studies reveal the factors that may enable transition to a more democratic system and alternatively the factors that inhibit democratic transition and push countries down a more authoritarian path In turn three key models that follow the fall of a political strongman emerge democratization with substantial political reform and consolidation democratization with limited political reform leading to weak democratic institutions and instability and an alternative political system with sustained authoritarianism By tracing these very different paths and outcomes in the wake of a strongman s fall the contributors present valuable information for countries on the course towards democratization as well as governments and organisations who work to facilitate this process This book will be welcomed by students and scholars interested in Asian politics governance and democratization studies

Historical Dictionary of Thailand Gerald W. Fry, 2024-11-19 Throughout its history Siam and then later Thailand has shown remarkable resiliency adaptability and creativity in responding to serious threats and crises This augurs well for Thailand s capacity to deal with the serious problems described above and to flourish in the areas in which it has great potential and comparative advantage such as food exports kitchen of the world diverse genres of tourism health and wellness management creative design alternative energy sources great potential of solar energy and e vehicles regional transportation hub both rail and air export growth and diversification an attractive site for MICE and as an international education hub Thailand clearly has the potential to become one of the most distinct vibrant creative and diverse societies of the dynamic Asia Pacific region

Historical Dictionary of Thailand Fourth Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 1 000 cross referenced entries on important personalities as well as aspects of the country s politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Thailand

Surviving Capitalism Erik Ringmar, 2005-08 A fresh funny and imaginative discourse on the nature of capitalism and how society has learned to cope with it

Globalization and Regulatory Character Fiona Haines, 2019-06-04 Originally published in 2005 Uniting critical debates on globalization with those on regulation this book provides an innovative account of the fate of safety regulation in the face of global pressures The author addresses the key question of whether globalization is making safety standards better or worse She analyzes the diverse strands of globalization that threaten safety standards and examines the measures that hold potential for beneficial change

Regulatory character a theoretical model that captures local economic political and cultural influence developed in the work sheds light on how and why regulation and safety standards do or do not change in the face of a crisis The theoretical work is grounded and illuminated by research on the Thai government s response to the Kader fire set in the rapidly industrializing context of Southeast Asia Theoretically rigorous and empirically rich the book has critical contemporary social relevance It

demonstrates a diverse theoretical heritage embracing Weber Douglas and Christopher Hood amongst others that critically and productively engages with research and policy making to raise safety standards

Energy Security and the Indian Ocean Region Dennis Rumley, Sanjay Chaturvedi, 2015-07-24 First published in 2005 this book is the second volume produced by the Indian Ocean Research Group IORG The Indian Ocean Region has become increasingly important to discussions on energy security not only because of the critical importance of regional states as energy suppliers but also because of the essential role of the Ocean as an energy route The main purpose of this volume is to provide an elaborate and critical evaluation of some of these issues and their implications for regions outside the Indian Ocean

Law and Development in Asia Gerald Paul McAlinn, Caslav Pejovic, 2012-03-15 This book fills a gap in the literature by presenting a comprehensive overview of the key issues relating to law and development in Asia Over recent decades experts in law and development have produced multiple theories on law and development none of which were derived from close study of Asian countries and none of which fit very well with the existing evidence of how law actually functioned in these countries during periods of rapid economic development The book discusses the different models of law and development including both the developmental state model of the 1960s and the neo liberal model of the 1980s and shows how development has worked out in practice in relation to these models in a range of Asian countries including Japan Korea China Thailand Singapore India and Mongolia Particular themes examined include constitutionalism judicial and legal reform labour law the growing importance of private rights foreign investment and the international law of development Reflecting the complexity of Asian law and society both those who believe in an Asian Way which is radically different from law and development in other parts of the world as well as those who believe the arc of law and development is essentially universal will find support in this book

Political Booms Lynn T. White, 2009 Why have Taiwan rich parts of China and Thailand boomed famously while the Philippines has long remained stagnant both economically and politically Do booms abet democracy Does the rise of middle OC classes OCO promise future liberalization Why has Philippine democracy brought no boom and barely served the Filipino people This book unlike most previous studies shows that both the roots and results of growth are largely political rather than economic Specifically it pays attention to local not just national power networks that caused or prevented growth in the four places under consideration Violence has been common in these polities along with money Elections have contributed to socio political problems that are also obvious in Leninist or junta regimes because elections are surprisingly easy to buy with corrupt money from government contracts Liberals should pay more serious theoretical attention to the effects of money on justice and Western political science should focus more clearly on the ways non state local power affects elections By considering the effects on fair justice of local money and power largely from small and medium sized firms that emerge after agrarian reforms this book asks democrats to face squarely the extent to which electoral procedures fail to help ordinary citizens Students and scholars of Asia will all need this book OCo as will students of the West whose methods have become
