The Psychology of Closed Self-Paced Motor Tasks in Sports Ronnie Lidor, Gal

Ziv, 2022-06-01 In practice settings competitions and games athletes are often required to perform an arsenal of motor tasks in dynamic and challenged sporting environments where they have to respond without having enough time to prepare themselves for the act However in many sport activities athletes also perform closed self paced motor tasks tasks that take place in a relatively stable and predictable environment where there is adequate time to prepare for their execution Among these tasks are free throw shots in basketball putting in golf serving in tennis and bowling In these tasks performers are able to plan their actions in advance They can activate a plan a strategy a protocol or a procedure what we term a ritual behavior Effective rituals are usually achieved with a high degree of consistency That is either deliberately or subconsciously they become an integral part of the act itself The Psychology of Closed Self Paced Motor Tasks in Sports explores those plans

procedures protocols strategies and techniques that aim at facilitating the performance and learning of closed self paced motor tasks Included in the instructional psychological routines discussed in this book are pre performance routines focusing attention motor imagery enhanced expectancies autonomy support gaze strategies self talk and periodization The routines discussed in the book are evidence based Based on updated reviews of laboratory and field inquiries on the discussed instructional psychological routines practical implications are given for those professionals who teach closed self paced motor tasks including coaches instructors and sport psychology consultants
