Index to Media and Materials for the Mentally Retarded, Specific Learning Disabled, Emotionally Disturbed National Information Center for Special Education Materials,1978 **Scalable Optimization via Probabilistic Modeling** Martin Pelikan,Kumara Sastry,Erick Cantú-Paz,2007-01-12 I m not usually a fan of edited volumes Too often they are an incoherent hodgepodge of remnants renegades or rejects foisted upon an unsuspecting reading public under a misleading or fraudulent title The volume Scalable Optimization via Probabilistic Modeling From Algorithms to Applications is a worthy addition to your library because it succeeds on exactly those dimensions where so many edited volumes fail For example take the title Scalable Optimization via Probabilistic Modeling From Algorithms to Applications You need not worry that you are going to pick up this book and find stray articles about anything else This book

focuses like a laser beam on one of the hottest topics in evolutionary computation over the last decade or so estimation of distribution algorithms EDAs EDAs borrow evolutionary computation's population orientation and selectionism and throw out the genetics to give us a hybrid of substantial power elegance and extensibility The article sequencing in most edited volumes is hard to understand but from the get go the editors of this volume have assembled a set of articles sequenced in a logical fashion The book moves from design to efficiency enhancement and then concludes with relevant applications The emphasis on efficiency enhancement is particularly important because the data mining perspective implicit in EDAs opens up the world of optimization to new methods of data guided adaptation that can further speed solutions through the construction and utilization of effective surrogates hybrids and parallel and temporal decompositions
