Animal Envy Ralph Nader, 2016-12-13 Ralph Nader's newest work of the imagination Animal Envy is a fable about the kinds of intelligences that are all around us in other animals What would animals tell us about themselves about us if there were a common language among all animal species A bracingly simple idea one that has been used before in books like George Orwell's Animal Farm and E B White's Charlotte's Web among others but never like this In Animal Envy Ralph Nader proposes quite plausibly that a programmer has created a digital translation app whereby animals of different species from insects to whales can speak to one another and through a hyper advanced converter these animals can then also speak both collectively and individually to humans It is decided that there will be a global assembly It will be called The Great Talkout Humans are persuaded to reserve 100 hours of network coverage so The Great Talkout may begin and will be viewed by humans everywhere in all human languages as well as all animal languages The narrative that ensues is deeply felt and powerfully informed Just as he did when he wrote Only the Super Rich Can Save Us Nader shows here that his visionary genius knows no limits
