J. D. Green, 2011 An important account of the causes courses and consequences of the secularisation of modern English society **Secularisation in the Christian World** Dr Michael Snape, Professor Callum G Brown, 2013-06-28 The power of modernity to secularise has been a foundational idea of the western world Both social science and church history understood that the Christian religion from 1750 was deeply vulnerable to industrial urbanisation and the Enlightenment But as evidence mounts that countries of the European world experienced secularising forces in different ways at different periods the timing and causes of de Christianisation are now widely seen as far from straightforward Secularisation in the Christian World brings together leading scholars in the social history of religion and the sociology of religion to explore what we know about the decline of organised Christianity in Britain Europe the United States Canada and Australia The chapters tackle different strands themes comparisons and territories to demonstrate the diversity of approach thinking and evidence that has emerged in the last 30 years of scholarship into the religious past and present The volume includes both new research and essays of theoretical

Field,2017-03-16

Secularization in the Long 1960s Numerating Religion in Britain provides a major empirical contribution to the literature of secularization It moves beyond the now largely sterile and theoretical debates about the validity of the secularization thesis or paradigm Combining historical and social scientific perspectives Clive D Field uses a wide range of quantitative sources to probe the extent and pace of religious change in Britain during the long 1960s In most cases data is presented for the years 1955 80 with particular attention to the methodological and other challenges posed by each source type Following an introductory chapter which reviews the historiography introduces the sources and defines the chronological and other parameters Field provides evidence for all major facets of religious belonging behaving and believing as well as for institutional church measures The work engages with and largely refutes Callum G Brown s influential assertion that Britain experienced revolutionary secularization in the 1960s which was highly gendered in nature and with 1963 the major tipping point Instead a more nuanced picture emerges with some religious indicators in crisis others continuing on an existing downward trajectory and yet others remaining stable Building on previous research by the author and other scholars and rejecting recent proponents of counter secularization the long 1960s are ultimately located within the context of a longstanding gradualist and still ongoing process of secularization in Britain **Modernism and Theology** Joanna

Rzepa,2021-03-16 This is the first book length study to examine the interface between literary and theological modernisms It provides a comprehensive account of literary responses to the modernist crisis in Christian theology from a transnational and interdenominational perspective It offers a cultural history of the period considering a wide range of literary and historical sources including novels drama poetry literary criticism encyclicals theological and philosophical treatises periodical publications and wartime propaganda By contextualising literary modernism within the cultural religious and political landscape the book reveals fundamental yet largely forgotten connections between literary and theological modernisms It shows that early twentieth century authors poets and critics including Rainer Maria Rilke T S Eliot and Czes aw Mi osz actively engaged with the debates between modernist and neo scholastic theologians raging across Europe These debates contributed to developing new ways of thinking about the relationship between religion and literature and informed contemporary critical writings on aesthetics and poetics **Antropologie van de godsdienst** Valeer Neckebrouck,2008
