## **Security And Defence Policy In The European Union The European Union Series:**

**The Foreign Policy of the European Union** Federiga Bindi, 2010-03-01 In a relatively short time the European Union has become one of the world's most powerful and important bodies. Its critical role in international affairs extends to several different areas: economics, culture, the environment, and of course international security and foreign affairs. This important volume explains and evaluates EU foreign policy in all its confusing dimensions. Is there really any such thing as European Union Foreign Policy? If so, what is it? What are its goals and priorities, and how effective is it? How do outsiders perceive EU foreign policy, and what are the ramifications of those views? Those are just some of the questions this book tries to answer. In order to draw the most comprehensive picture possible of EU foreign policy, Federiga Bindi and her contributors dissect both horizontal and vertical issues. Vertical concerns focus on particular geographic regions such as the EU's foreign policy toward Africa and Asia and its relations with the United States. Horizontal issues explore wider crosscutting themes that help explain the EU's foreign policy choices and operations, such as decisionmaking processes and procedures, European self-identity, and core priorities such as peace, democracy, and human rights. Contents: Foreword by Giuliano Amato, former foreign minister and prime minister of Italy; Part I: The New Tools of EU Foreign Policy; II: US-EU Relations after the Elections; III: EU Relations with the Rest of the Americas; IV: Africa and Asia; V: The EU and Its Neighbors; VI: The EU, the Mediterranean, and the Middle East; VII: Promoting Values and Models Abroad; VIII: Conclusions: Assessing EU Foreign Policy. *The European Union and the Use of Military Force* Tommi Koivula, 2016-05-26 Koivula examines the discursive space related to the use of military force by the European Union. EU. By examining the EU's relationship to its use of military force during the course of its history and by demonstrating that the contemporary discursive space of the EU military dimension is incoherent in nature and contains inherent contradictions, he seeks to answer the related question of whether extreme forms of military enforcement, for example, killing, is appropriate for the EU. **The European Union and National Defence Policy** Jolyon Howorth, Anand Menon, 2005-08-18 Filling a surprising gap in existing studies, this book addresses many of the unanswered questions surrounding the role of European integration in shaping national defence policy. The impressive array of contributors consider the pressures on state policy emanating from the process of integration. The book is divided into three distinct parts: an outline of the tortuous history of attempts to link defence with European integration; a study of the four larger member states, France, Germany, Italy, and the UK, as well as a chapter on The Netherlands; an analysis of the effects of the nuclear weapons and arms procurement policies. This, the second book in The State and the European Union series, sheds light on an increasingly important and topical aspect of contemporary European security and will be essential reading for those studying European Politics, Public Policy, and International Relations. **Military Crisis Management Operations by NATO and the EU** Claudia Fahren-Hussey, 2018-09-06 This book analyzes both NATO's and the EU's military crisis management operations and provides an explanation for the fact that it is sometimes NATO, sometimes the EU, and sometimes both.

international organizations that intervene militarily in a conflict In detailed case studies on Libya Chad Central African Republic and the Horn of Africa Claudia Fahren Hussey shows that the capabilities and preferences of the organizations matter most and the organizations bureaucratic actors influence the decision making process of the member states

**The Handbook of European Defence Policies and Armed Forces** Hugo Meijer, Marco Wyss, 2018-06-22 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe s major medium and lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe

**Foreign Policies of EU Member States** Amelia Hadfield, Ian Manners, Richard G. Whitman, 2017-06-14 Foreign Policies of EU Member States provides a clear and current overview of the motivations and outcomes of EU Member States regarding their foreign policy making within and beyond the EU It provides an in depth analysis of intra EU policy making and sheds light in an innovative and understandable way on the lesser known aspects of the inter EU and extra EU foreign policies of the twenty eight Member States The text has an innovative method of thematic organisation in which case study state profiles emerge via dominant foreign policy themes The text examines the three main policy challenges currently faced by the twenty eight Member States First EU Member States must cooperate within the mechanisms of the EU including the Common Foreign and Security Policy CFSP Second EU Member States continue to construct their own inter EU foreign policies Third the sovereign prerogative exercised by all EU Member States is to construct their own foreign policies on everything from trade and defence with the rest of the world This combination of clarity thematic structure and empirical case studies make this an ideal textbook for all upper level students of European foreign policy comparative European politics and European studies
