Seeking Sickness Medical Screening And The Misguided Hunt For Disease:

Seeking Sickness Alan Cassels, 2012-04-30 Alan Cassels strips layers of expectation hype jargon false starts and conflicts of interest off the medical screening mantra Nortin M Hadler author of *Worried Sick* Why wouldn't you want to be screened to see if you're at risk for cancer heart disease or another potentially lethal condition After all better safe than sorry Right Not so fast says Alan Cassels His *Seeking Sickness* takes us inside the world of medical screening where well meaning practitioners and a profit motivated industry offer to save our lives by exploiting our fears He writes that promoters of screening overpromise on its benefits and downplay its harms which can range from the merely annoying to the life threatening If you're facing a screening test for breast or prostate cancer high cholesterol or low testosterone someone is about to turn you into a patient You need to ask yourself one simple question Am I ready for all the things that could go wrong With engaging clarity backed by academic rigor Cassels discusses a variety of popular investigational procedures an excellent way to start the important process of self education Quill Quire Smartly written and very readable Brian Goldman MD author of *The Secret Language of Doctors* Cassels tackles this touchy topic looking at it test by test His overarching message is that modern medicine has overpromised with claims that screening will save our lives He contends that with the lack of hard evidence on benefits the evidence of harm from by such screening as well as the multi billion dollar interests at stake we should approach this kind of screening with great precaution Canadian Women's Health Network **Screening**

Sandy Hook Deanna Spingola, 2015-02-03 Most parents would never consider dispensing deadly addictive street drugs to their children but if a trusted physician writes a prescription for an FDA approved schedule 2 medication for their two year old based on some questionable mental health screening those unwary parents do not question or object Despite side effect warnings regularly revealed during TV ads parents frequently fail to take those warnings seriously perhaps presuming that the side effects are happenstance or rarely occur Over the decades because organized psychiatry represented by the American Psychiatric Association APA convened numerous consensus panels that designed hundreds of non biologically based disorders for its Diagnostic and Statistical Manual of Mental Disorders DSM especially suitable for the pill for every ill pharmaceutical industry that conceivably already had many profitable solutions for the disorders in the pre production process The consequences have been disastrous with no discernable end in sight some people taking prescription drugs or withdrawing from them have perpetrated school mall and public shootings That is in addition to thousands of suicides that the public never hears about unless the victim is a well known public figure like Robin Williams Just the military related suicide rate is 8 000 per year untold numbers of these are the result of the psych drug cocktails doled out by psychiatrists working for the VA The government is big pharma's largest customer In addition to the homicides and suicides irreversible brain damage results from drug remedies to temporary problems that might have been easily resolved through compassionate interaction and talk therapy Despite the claims that drugs were not a factor in the Sandy Hook mass murders

certain circumstances provide a different picture Adam Lanza always a unique individual changed from being a geeky weird kid to being a mass murderer not of people his own age but of beautiful vulnerable children feeling secure in their classrooms in a sleepy bedroom community in Connecticut

Matters Noralou Roos, Sharon Manson Singer, Kathleen O'Grady, Shannon Turczak, Camilla Tapp, 2013 Canadian Health Policy in the News is a compendium of the commentaries or OpEds published by Evidence Network in major newspapers across the country from April 2011 up to October 2012. It is a timely balanced and non-partisan snapshot of what's new and controversial concerning our healthcare system and related social programs that affect health and well-being in our country with evidence at the forefront. This book is available free of charge so that you can share it widely in your classrooms amongst your friends and colleagues on your websites and via social media. Canadian health policy will always be emerging and unfolding responding to changing environmental and economic factors, new technologies, publicly held values and differing political landscapes. Canadian Health Policy in the News captures a moment in time and presents the issues that concern Canadians most, grounding our national discourse and debate on healthcare in the best evidence. Medical Nihilism Jacob Stegenga, 2018-03-08 This book argues that if we consider the ubiquity of small effect sizes in medicine, the extent of misleading evidence in medical research, the thin theoretical basis of many interventions and the malleability of empirical methods, and if we employ our best inductive framework, then our confidence in medical interventions ought to be low.

Health Communication for Health Care Professionals Michael P. Pagano, 2016-08-28 Promotes an interdisciplinary approach to the study of health communication. According to the Joint Commission, over 75% of all serious medical errors in this country result from miscommunication. Based in these adverse realities and the author's philosophy that communication is a clinical skill integral to effective health care delivery, this comprehensive text addresses the theories and abilities needed by all health care providers. The only text written specifically for students of nursing, medicine, physical therapy, pharmacy, dentistry, physician assistants, and opticians, this book incorporates recommendations for specific multimedia suggestions for class discussion and interactive case studies to provide a rich and multi-perspective learning experience for gaining optimal expertise in effective health communication. The author underscores the importance of developing and maintaining successful relationships with patients, peers, and colleagues as a cornerstone of effective health care outcomes. With an emphasis on interactive learning, the text utilizes communication theories to analyze verbal and non-verbal behaviors in diverse health care contexts and assess which are more effective and why. Summaries at the end of each chapter discuss health communication outcomes. Chapters cover interpersonal and gendered communication, provider-patient communication, intercultural communication, organizational communication, team communication, malpractice, palliative care, end-of-life communication, and many other topics.

Key Features: Fosters a patient-centered interdisciplinary, multidimensional learning experience for health care students. Recommends experiential learning using videos, films, and related discussion exercises. Presents case study role plays. Provides companion case study resource to enhance learning objectives.
