Sei Business Builder:

Making Teams Work Donna Deepröse, 2001 **Building the Knowledge Economy** Paul M. Cunningham, Miriam Cunningham, Peter Fatelnig, 2003 The importance of the Internet and information and communication technologies to the global economy has never been greater This volume aims to facilitate knowledge sharing relevant to everyone irrespective of background thematic or geographic focus **Building Materials**, 1984 **Handbook of Research on Building Information Modeling and Construction Informatics: Concepts and Technologies** Underwood, Jason, Isikdag, Umit, 2009-12-31 In recent years building information modeling has become a very active research area of construction informatics with investigation of ICT use within construction industry processes and organizations The Handbook of Research on Building Information Modeling and Construction Informatics Concepts and Technologies addresses the problems related to information integration and interoperability throughout the lifecycle of a building from feasibility and conceptual design through to demolition and recycling stages Containing research from leading international experts this Handbook of Research provides comprehensive coverage and definitions of the most important issues concepts trends and technologies within the field **Electrifying India** Sunila S. Kale, 2014-04-09 Throughout the 20th century electricity was considered to be the primary vehicle of modernity as well as its quintessential symbol In India electrification was central to how early nationalists and planners conceptualized Indian development and huge sums were spent on the project from then until now Yet despite all this sixty five years after independence nearly 400 million Indians have no access to electricity Electrifying India explores the political and historical puzzle of uneven development in India's vital electricity sector In some states nearly all citizens have access to electricity while in others fewer than half of households have reliable electricity To help explain this variation this book offers both a regional and a historical perspective on the politics of electrification of India as it unfolded in New Delhi and three Indian states Maharashtra Odisha and Andhra Pradesh In those parts of the countryside that were successfully electrified in the decades after independence the gains were due to neither nationalist idealism nor merely technocratic plans but rather to the rising political influence and pressure of rural constituencies In looking at variation in how public utilities expanded over a long period of time this book argues that the earlier period of an advancing state apparatus from the 1950s to the 1980s conditioned in important ways the manner of the state's retreat during market reforms from the 1990s onward *Investing in Resource Efficiency* Florian Flachenecker, Jun Rentschler, 2018-08-21 This book covers the multi faceted incentives trade offs and challenges associated with the economics and politics of resource efficiency investments By contributing a wide range of empirical evidence practitioners insights and policy perspectives this book carefully examines the role of resource efficiency in reconciling environmental and economic considerations It also discusses the critical role of resource efficiency investments in mitigating climate change and enabling sustainable development Featuring expert insights from academia the European Commission the European Investment Bank

and the European Bank for Reconstruction and Development this book provides a policy oriented guide reference and toolbox for unlocking the potential of resource efficiency To this end it identifies practical measures for overcoming barriers and creating smart incentives for leveraging resource efficiency investments Overall this book brings together evidence to develop innovative ideas and strategies for improving the efficient use of resources and advancing clean and sustainable development This book is an important and timely contribution Angel Gurria Secretary General OECD
