Selling Our Souls Commodification Hospital:

Selling Our Souls Adam Dalton Reich, 2016-11-08 Health care costs make up nearly a fifth of U S gross domestic product but health care is a peculiar thing to buy and sell Both a scarce resource and a basic need it involves physical and emotional vulnerability and at the same time it operates as big business Patients have little choice but to trust those who provide them care but even those providers confront a great deal of medical uncertainty about the services they offer *Selling Our Souls* looks at the contradictions inherent in one particular health care market hospital care Based on extensive interviews and observations across the three hospitals of one California city the book explores the tensions embedded in the market for hospital care how different hospitals manage these tensions the historical trajectories driving disparities in contemporary hospital practice and the perils and possibilities of various models of care As Adam Reich shows the book's three featured hospitals could not be more different in background or contemporary practice PubliCare was founded in the late nineteenth century as an almshouse in order to address the needs of the destitute HolyCare was founded by an order of nuns in the mid twentieth century offering spiritual comfort to the paying patient And GroupCare was founded in the late twentieth century to rationalize and economize care for middle class patients and their employers Reich explains how these legacies play out today in terms of the hospitals' different responses to similar market pressures and the varieties of care that result *Selling Our Souls* is an in depth investigation into how hospital organizations and the people who work in them make sense of and respond to the modern health care market

The ^ACritique of Commodification Christoph Hermann, 2021-07-05 In *The Critique of Commodification* Christoph Hermann argues that commodification entails production for profit rather than provision for need The focus on profits Hermann shows means that social needs are met in a way that excludes those who cannot pay and ensures high profits In going through the damaging effects of commodification Hermann also discusses alternatives based on the satisfaction of needs rather than maximization of profits

The Nonprofit Sector Walter W Powell, Patricia Bromley, 2023-05-25 Timely unique and definitive not only chronicles the history of the nonprofit sector but also provides a broad but critical analysis of its current state Vartan Gregorian President Carnegie Corporation of New York The nonprofit sector has changed in fundamental ways in recent decades As the sector has grown in scope and size both domestically and internationally the boundaries between for profit governmental and charitable organizations have become intertwined Nonprofits are increasingly challenged on their roles in mitigating or exacerbating inequality And debates flare over the role of voluntary organizations in democratic and autocratic societies alike *The Nonprofit Sector* takes up these concerns and offers a cutting edge empirical and theoretical assessment of the state of the field This book now in its third edition brings together leading researchers economists historians philosophers political scientists and sociologists along with scholars from communication education law management and policy schools to investigate the impact of associational life Chapters consider the history of the nonprofit sector and of philanthropy the politics of the public sphere governance mission

and engagement access and inclusion and global perspectives on nonprofit organizations Across this comprehensive range of topics The Nonprofit Sector makes an essential contribution to the study of civil society Praise for previous editions Takes a decidedly multidisciplinary approach invaluable Journal of Policy Analysis and Management A major contribution to the field Social Forces

The Hospital Brian Alexander, 2021-03-09 USA Today s 5 BOOKS NOT TO MISS Alexander nimbly and grippingly translates the byzantine world of American health care into a real life narrative with people you come to care about New York Times Takes readers into the world of the American medical industry in a way no book has done before Fortune With his signature gut punching prose Alexander breaks our hearts as he opens our eyes to America s deep rooted sickness and despair by immersing us in the lives of a small town hospital and the people it serves Beth Macy bestselling author of Dopesick By following the struggle for survival of one small town hospital and the patients who walk or are carried through its doors The Hospital takes readers into the world of the American medical industry in a way no book has done before Americans are dying sooner and living in poorer health Alexander argues that no plan will solve America s health crisis until the deeper causes of that crisis are addressed Bryan Ohio s hospital is losing money making it vulnerable to big health systems seeking domination and Phil Ennen CEO has been fighting to preserve its independence Meanwhile Bryan a town of 8 500 people in Ohio s northwest corner is still trying to recover from the Great Recession As local leaders struggle to address the town s problems and the hospital fights for its life amid a rapidly consolidating medical and hospital industry a 39 year old diabetic literally fights for his limbs and a 55 year old contractor lies dying in the emergency room With these and other stories Alexander strips away the wonkiness of policy to reveal Americans struggle for health against a powerful system that s stacked against them but yet so fragile it blows apart when the pandemic hits Culminating with COVID 19 this book offers a blueprint for how we created the crisis we re in

Toward the Health of a Nation Leslie A.

Boehm, 2020-10-22 Canadians view their healthcare recognized throughout the world as an exemplary system as iconic and integral to their identity In Toward the Health of a Nation Leslie Boehm recounts the first seventy years in the life of one of the foundations of Canada s healthcare system the Institute of Health Policy Management and Evaluation at the University of Toronto Boehm a graduate of IHPME and an instructor there throughout his career charts the institute s history from its inception in 1947 as the Department of Hospital Administration to the present day The first program of its kind in Canada and one of the few in the world the school was founded at a time when the issue of healthcare was becoming a significant part of national and provincial discussions and policies Initially concentrating on hospital management and professional degrees it has expanded to offer academic degrees and facilitate important research into health systems policies and outcomes In Toward the Health of a Nation Boehm demonstrates the excellence of the program its faculty and its graduates as well as their accomplishments in major government initiatives and royal commissions In the seventy years since IHPME s inception healthcare has grown to become a major part of government and business activity and it will only increase in

coming years An in depth history of a major program in graduate health education Toward the Health of a Nation highlights how important healthcare is to a modern functional society **Bishops and Bodies** Lori Freedman,2023-07-14 Winner of the 2024 Donald W Light Award for Applied Medical Sociology American Sociological Association s Section on Medical Sociology One out of every six patients in the United States is treated in a Catholic hospital that follows the policies of the U S Conference of Catholic Bishops These policies prohibit abortion sterilization contraception some treatments for miscarriage and gender confirmation and other reproductive care undermining hard won patients rights to bodily autonomy and informed decision making Drawing on rich interviews with patients and providers this book reveals both how the bishops directives operate and how people inside Catholic hospitals navigate the resulting restrictions on medical practice In doing so Bishops and Bodies fleshes out a vivid picture of how The Church s stance on sex reproduction and life itself manifests in institutions that affect us all **The Social Transformation of American Medicine** Paul Starr,2017-05-30 A monumental

achievement New York Times and the winner of the Pulitzer Prize and the Bancroft Prize in American History this is a landmark history of the American health care system Considered the definitive history of the American health care system The Social Transformation of American Medicine examines how the roles of doctors hospitals health plans and government programs have evolved over the last two and a half centuries How did the financially insecure medical profession of the nineteenth century become a prosperous one in the twentieth Why was national health insurance blocked And why are corporate institutions taking over our medical system today Beginning in 1760 and coming up to the present day renowned sociologist Paul Starr traces the decline of professional sovereignty in medicine the political struggles over health care and the rise of a corporate system Updated with a new preface and an epilogue analyzing developments since the early 1980s The Social Transformation of American Medicine is a must read for anyone concerned about the future of our fraught health care system **The Next Shift** Gabriel Winant,2021-03-23 Winner of the Frederick Jackson Turner Award Winner of the Isaac and Tamara Deutscher Memorial Prize Winner of the C L R James Award A ProMarket Best Political Economy Book of the Year Men in hardhats were once the heart of America s working class now it is women in scrubs What does this shift portend for our future Pittsburgh was once synonymous with steel But today most of its mills are gone Like so many places across the United States a city that was a center of blue collar manufacturing is now dominated by the service economy particularly health care which employs more Americans than any other industry Gabriel Winant takes us inside the Rust Belt to show how America s cities have weathered new economic realities In Pittsburgh s neighborhoods he finds that a new working class has emerged in the wake of deindustrialization As steelworkers and their families grew older they required more health care Even as the industrial economy contracted sharply the care economy thrived Hospitals and nursing homes went on hiring sprees But many care jobs bear little resemblance to the manufacturing work the city lost Unlike their blue collar predecessors home health aides and hospital staff work unpredictable hours for low pay And the new working class

disproportionately comprises women and people of color Today health care workers are on the front lines of our most pressing crises yet we have been slow to appreciate that they are the face of our twenty first century workforce The Next Shift offers unique insights into how we got here and what could happen next If health care employees along with other essential workers can translate the increasing recognition of their economic value into political power they may become a major force in the twenty first century

Dying and Living in the Neighborhood Prabhjot Singh, 2016-09-15 Have neighborhoods been left out of the seismic healthcare reform efforts to connect struggling Americans with the help they need Even as US spending on healthcare skyrockets impoverished Americans continue to fall ill and die of preventable conditions Although the majority of health outcomes are shaped by non medical factors public and private healthcare reform efforts have largely ignored the complex local circumstances that make it difficult for struggling men women and children to live healthier lives In Dying and Living in the Neighborhood Dr Prabhjot Singh argues that we must look beyond the walls of the hospital and into the neighborhoods where patients live and die to address the troubling rise in chronic disease Building on his training as a physician in Harlem Dr Singh draws from research in sociology and economics to look at how our healthcare systems are designed and how the development of technologies like the Internet enable us to rethink strategies for assembling healthier neighborhoods In part I Singh presents the story of Ray a patient whose death illuminated how he had lived his neighborhood context and the forces that accelerated his decline In part II Singh introduces nationally recognized pioneers who are acting on the local level to build critical components of a neighborhood based health system In the process he encounters a movement of people and organizations with similar visions of a porous neighborhood embedded healthcare system Finally in part III he explores how civic technologies may help forge a new set of relationships among healthcare public health and community development Every rising public health leader frontline clinician and policymaker in the country should read this book to better understand how they can contribute to a more integrated and supportive healthcare system

The Golden Passport Kristin Surak, 2023-09-19 Kristin Surak offers the first on the ground investigation of the global market in citizenship for the rich She tracks the countries that sell citizenship the elites who buy it and the intermediaries who make the market revealing how citizenship by investment became a popular option that now accounts for over 50 000 naturalizations annually
