Reading Machines Toward An Algorithmic Criticism Stephen Ramsay:

Reading Machines Stephen Ramsay, 2011-11-30 Besides familiar and now commonplace tasks that computers do all the time what else are they capable of Stephen Ramsay's intriguing study of computational text analysis examines how computers can be used as reading machines to open up entirely new possibilities for literary critics Computer based text analysis has been employed for the past several decades as a way of searching collating and indexing texts Despite this the digital revolution has not penetrated the core activity of literary studies interpretive analysis of written texts Computers can handle vast amounts of data allowing for the comparison of texts in ways that were previously too overwhelming for individuals but they may also assist in enhancing the entirely necessary role of subjectivity in critical interpretation Reading Machines discusses the importance of this new form of text analysis conducted with the assistance of computers Ramsay suggests that the rigidity of computation can be enlisted in the project of intuition subjectivity and play

Ethics of the Algorithm Todd Presner, 2024-09-24 How computational methods can expand how we see read and listen to Holocaust testimony The Holocaust is one of the most documented and now digitized events in human history Institutions and archives hold hundreds of thousands of hours of audio and video testimony composed of more than a billion words in dozens of languages with millions of pieces of descriptive metadata It would take several lifetimes to engage with these testimonies one at a time Computational methods could be used to analyze an entire archive but what are the ethical implications of listening to Holocaust testimonies by means of an algorithm In this book Todd Presner explores how the digital humanities can provide both new insights and humanizing perspectives for Holocaust memory and history Presner suggests that it is possible to develop an ethics of the algorithm that mediates between the ethical demands of listening to individual testimonies and the interpretative possibilities of computational methods He delves into thousands of testimonies and witness accounts focusing on the analysis of trauma language voice genre and the archive itself Tracing the affordances of digital tools that range from early proto computational approaches to more recent uses of automatic speech recognition and natural language processing Presner introduces readers to what may be the ultimate expression of these methods AI driven testimonies that use machine learning to process responses to questions offering a user experience that seems to replicate an actual conversation with a Holocaust survivor With Ethics of the Algorithm Presner presents a digital humanities argument for how big data models and computational methods can be used to preserve and perpetuate cultural memory

Algorithmic Culture Before the Internet Ted Striphas, 2023-06-06 Honorable Mention 2024 ngel David Nieves Book Award American Studies Association Digital Humanities Caucus Today algorithms exercise outsize influence on cultural decision making shaping and even reshaping the concept of culture How were automated computational processes empowered to perform this work What forces prompted the emergence of algorithmic culture Algorithmic Culture Before the Internet is a history of how culture and computation came to be entangled From Cambridge England to Cambridge Massachusetts by way of medieval Baghdad this

book pinpoints the critical junctures at which algorithmic culture began to coalesce in language long before it materialized in the technological wizardry of Silicon Valley

Revising and extending the methodology of keywords Ted Striphas examines changing concepts and definitions of culture including the development of the field of cultural studies and stresses the importance of language in the history of technology Offering historical and interdisciplinary perspective on the relationship of culture and computation this book provides urgently needed context for the algorithmic injustices that beset the world today

Historical Turns Nicholas Baer, 2024-07-30 *Historical Turns* reassesses Weimar cinema in light of the crisis of historicism widely diagnosed by German philosophers in the early twentieth century Through bold new analyses of five legendary works of German silent cinema *The Cabinet of Dr Caligari* *Destiny* *Rhythm 21* *The Holy Mountain* and *Metropolis* Nicholas Baer argues that films of the Weimar Republic lent vivid expression to the crisis of historical thinking With their experiments in cinematic form and style these modernist films revealed the capacity of the medium to engage with fundamental questions about the philosophy of history Reconstructing the debates over historicism that unfolded during the initial decades of moving image culture *Historical Turns* proposes a more reflexive mode of historiography and expands the field of film and media philosophy The book excavates a rich archive of ideas that illuminate our own moment of rapid media transformation and political economic and environmental crises around the globe

The Digital Humanities and Literary Studies Martin Paul Eve, 2022 A short introduction and overview of developing intersections between digital methods and literary studies that offers the best starting place for those who wish to learn more about the possibilities but also the limitations of the digital humanities in the literary space

Literature in the Digital Age Adam Hammond, 2016-03-09 This book guides readers through the most salient theoretical and creative possibilities opened up by the shift to digital literary forms

The New Pynchon Studies Joanna Freer, 2019-05-09 The essays in this collection are at the forefront of Pynchon studies representing distinctively twenty first century approaches to his work

Digital Milton David Currell, Islam Issa, 2018-08-23 *Digital Milton* is the first volume to investigate John Milton in terms of our digital present It explores the digital environments Milton now inhabits as well as the diverse digital methods that inform how we read teach edit and analyze his works Some chapters use innovative techniques such as processing metadata from vast archives of early modern prose coding Milton's geographical references on maps and visualizing debt networks from literature and from life Other chapters discuss the technologies and platforms shaping how literature reaches us today from audiobooks to eReaders from the OED Online to Wikipedia and from Twitter to YouTube *Digital Milton* is the first say on a topic that will become ever more important to scholars students and teachers of early modern literature in the years to come

Literary Mathematics Michael Gavin, 2022-10-25 Across the humanities and social sciences scholars increasingly use quantitative methods to study textual data Considered together this research represents an extraordinary event in the long history of textuality More or less all at once the corpus has emerged as a major genre of cultural and scientific knowledge In

Literary Mathematics Michael Gavin grapples with this development describing how quantitative methods for the study of textual data offer powerful tools for historical inquiry and sometimes unexpected perspectives on theoretical issues of concern to literary studies Student friendly and accessible the book advances this argument through case studies drawn from the Early English Books Online corpus Gavin shows how a copublication network of printers and authors reveals an uncannily accurate picture of historical periodization that a vector space semantic model parses historical concepts in incredibly fine detail and that a geospatial analysis of early modern discourse offers a surprising panoramic glimpse into the period's notion of world geography Across these case studies Gavin challenges readers to consider why corpus based methods work so effectively and asks whether the successes of formal modeling ought to inspire humanists to reconsider fundamental theoretical assumptions about textuality and meaning As Gavin reveals by embracing the expressive power of mathematics scholars can add new dimensions to digital humanities research and find new connections with the social sciences

Virtual Victorians Veronica Alfano, Andrew Stauffer, 2016-01-18 Exploring how scholars use digital resources to reconstruct the 19th century this volume probes key issues in the intersection of digital humanities and history Part I examines the potential of online research tools for literary scholarship while Part II outlines a prehistory of digital virtuality by exploring specific Victorian cultural forms
