Creating Human Value as Public Management Theory Joseph Drew, 2025-04-16 Creating Human Value CHV is a powerful public management theory that places the person at the centre of all decision making It is founded on millennia old natural law philosophy updated to cope with contemporary problems At the heart of CHV is the ideal of human flourishing this is achieved through pursuing the common good via public policy in a way that respects human dignity To paraphrase Socrates it is about caring for the city rather than merely the city's possessions This book is the product of almost a decade of research and teaching of this compelling alternate public management theory to government decision makers in Australia and abroad In sum CHV is a much needed antidote to currently popular public management approaches that have unduly prioritized the common good over dignity with catastrophic consequences for the lives of many people This book will appeal to readers interested in public management public policy and government

This book sets out to defend the claim that Equity ought to remain a separate body of law the temptation to iron out the differences between neighbouring doctrines on the two sides of the Equity Common Law divide should in most cases be resisted The theoretical part of the book is argues that the characteristics of Equity namely appeal to conscience flexibility retroactivity and the use of morally freighted jargon are essential for the implementation of a legal ideal that has been neglected by the Common Law Accountability Correspondence According to this fundamental legal ideal liability imposed by legal rules should correspond to the pattern of moral duty in the circumstances to which the rules apply Equity promotes this ideal in the fields of property and obligations by disallowing parties to exploit the rule like nature of Common Law norms in a way that breaches their moral duty to the other party By reference to various equitable doctrines it is argued that the faults identified by critics of Equity especially from the perspective of the Rule of Law are highly exaggerated and that the criticism often reflects a political belief in the supremacy of individualism and free market over empathy and social justice The theoretical part is followed by three chapters each dedicated to an in depth analysis of the equitable doctrines of fiduciary duties proprietary estoppel and clean hands For each doctrine it is shown how their equitable characteristics are indispensable for achieving their social ethical and economic purpose **Congressional Record** United States.
