Seeds Of Change Six Plants That Transformed Mankind:

Seeds of Change Henry Hobhouse, 1986 A fascinating account of how five plants quinine sugarcane tea cotton and the potato have impacted on humanity since the 16th century The significance of these plants has been felt socially industrially and economically in myriad ways A few examples give the flavor of this book By alleviating the debilitating effects of malaria quinine opened up the tropics making possible the development of the resources of Africa and Asia plus making available vast numbers of people for cheap labor Millions of black people were taken to the Caribbean to grow sugarcane for which there was an addictive demand A great demand also developed for tea in Europe because it was a stimulating nonalcoholic drink To pay for the tea the British exchanged opium which caused the decline of China Cotton prolonged the use of slavery a lucrative trade in itself and ultimately led to Civil War in the US even though slavery had already fallen into disfavor in other parts of the world By citing many primary sources Hobhouse graphically illustrates the changes in the course of human history that are attributable to plants rather than to the human factors usually cited New insights and perspectives on the impact of plants and nature gleaned from this book are compelling Highly recommended C S Dunn University of North Carolina at Wilmington Choice Reviews

Seeds of Change Henry Hobhouse, 2005-11-22 A personal and highly original take on the history of six commercial plants Seeds of Change illuminates how sugar tea cotton the potato quinine and the cocoa plant have shaped our past In this fascinating account the impassioned Henry Hobhouse explains the consequences of these plants with attention grabbing historical moments While most records of history focus on human influence Hobhouse emphasizes how plants too are a central and influential factor in the historical process Seeds of Change is a captivating and invaluable addition to our understanding of modern culture

Cataclysms Laurent Testot, 2020-11-09 Humanity is by many measures the biggest success story in the animal kingdom, but what are the costs of this triumph? Over its three million years of existence, the human species has continuously modified nature and drained its resources. In *Cataclysms*, Laurent Testot provides the full tally, offering a comprehensive environmental history of humanity's unmatched and perhaps irreversible influence on the world. Testot explores the interconnected histories of human evolution and planetary deterioration, arguing that our development from naked apes to *Homo sapiens* has entailed wide-scale environmental harm. Testot makes the case that humans have usually been catastrophic for the planet: hyperpredators responsible for mass extinctions, deforestation, global warming, ocean acidification, and unchecked pollution, as well as the slaughter of our own species. Organized chronologically around seven technological revolutions, *Cataclysms* unspools the intertwined saga of humanity and our environment from our shy beginnings in Africa to today's domination of the planet, revealing how we have blown past any limits along the way, whether by exploding our own population numbers, domesticating countless other species, or harnessing energy from fossils. Testot's book, while sweeping, is light and approachable, telling the stories, sometimes rambunctious, sometimes appalling, of how a glorified monkey transformed its own environment beyond all recognition. In order to begin reversing our environmental disaster, we must have a better understanding of our own past and the incalculable environmental costs incurred at every stage of human innovation. *Cataclysms* offers that understanding and the hope that we can now begin to reform our relationship to the Earth.

The Age of Low Tech Philippe Bihouix, 2020-10-21 People often believe that we can overcome the profound environmental and climate crises we face by smart systems, green innovations, and more recycling. However, the quest for complex technological solutions, which rely on increasingly exotic and scarce materials, makes this unlikely. A best seller in France, this English language edition introduces readers to an alternative perspective on how we should be marshalling our resources to preserve the planet and secure our future. Bihouix skilfully goes against the grain to argue that high technology will not solve global problems and envisages a different approach to build a more resilient and sustainable society.
