[How to Photograph & Process Nightscapes and Time-Lapses](#) Alan Dyer, 2014-11-22

The book describes how to shoot and process still image nightscapes (images of landscapes taken at night by the light of the Moon or stars) and how to shoot and assemble time lapse movies of the stars and Milky Way turning above earthly scenes, all using DSLR cameras. The 400 page multi touch book includes 50 embedded HD videos (no internet connection required) demonstrating time lapse techniques, 60 multi page tutorials with step by step instructions of how to use software: Adobe Bridge, Adobe Camera Raw, Photoshop, Lightroom, LRTimelapse, Advanced Stacker, Actions, StarStaX, Panolapse, Sequence, GBTimelapse, and more. Numerous Photo 101 sections explaining the basic concepts of photography and video production: f stops, ISOs, file types, aspect ratios, frame rates, compression, etc. Numerous Astronomy 101 sections explaining the basics of how the sky works: how the sky moves, where the Moon can be found, when the Milky Way can be seen, when and where to see auroras. Reviews of gear: I don't just mention that specialized gear exists, I illustrate in detail how to use popular units such as the Time Lapse Michron and TriggerTrap intervalometers, and the All View mount, Radian, Mindarin, Astro eMotimo, and Dynamic Perception motion control units, with comments on what's good and not so good to use. You'll learn what are the best cameras and lenses to buy: cropped vs full frame, Canon vs Nikon, manual vs automatic lenses, zooms vs primes. what a wonderful thing it is to lie on your back and look up at the stars Pete Seeger What is the fascination that constellations hold for people There are probably as many different answers to that question as there are people For many though the constellations are the stepping off point into the fabulous mind bending discoveries and concepts of modern astronomy For others it is their long and intriguing history that beckons For some people the constellations provide the means for navigation and orientation over the surface of the Earth and of course there are the millions who place some faith in horoscopes But for most people the patterns in the sky are a beautiful part of their environment to be treasured alongside

the forests fields and rivers that make life worth living However just as we are losing our green environment to pollution so we are losing our sky The glow from cities across the world swamps the stars in the night sky Astronomers have had to retreat to remote mountain tops to escape that light pollution The rest of us must make do with what is available From the centre of a city or any other brightly lit area probably no stars at all will be visible even on the clearest of nights From the suburbs the brighter stars should normally be seen
