Seeing Red The True Story Of Blood:

Seeing Red Kirsten Karchmer, 2019-11-12 A world renowned women's health expert reveals a bold practical and data driven handbook for menstrual periods that provides an easy to navigate roadmap for improving your reproductive health and your everyday quality of life We've been lied to about periods PMS cramping bloating migraines irritability and anxiety may be extremely common but contrary to popular belief they aren't normal And they certainly aren't just part of being a woman despite the fact that this is what we've been told time and time again by friends family and even doctors After dedicating her entire clinical career to deconstructing the menstrual cycle women's health expert Kirsten Karchmer knows better During her more than twenty years of research and treating thousands of patients Karchmer found that most period problems women experience even the most painful ones are totally correctable and more surprisingly reflective of overall health and fertility In this forthright spirited and all encompassing guide Karchmer draws on her decades worth of experience as a women's health expert to break down the myths so many women have been led to believe about their periods For the more than 82 million women in the world who suffer from menstrual conditions **Seeing Red** explains the importance of a healthy menstrual cycle and how to achieve it and why it is important to the women's movement Menstrual cycles are not a curse but an instrument providing women with one of the most valuable regularly occurring and free diagnostic tools they have giving them access to unprecedented health and power

Seeing Red Pauline Sameshima, 2007 A brilliant and daring piece of

scholarship this book will raise eyebrows and spark much debate It does not simply break new ground it breaks all the rules ultimately compelling us to examine and embrace scholarship in fresh innovative ways Seeing Red is based on Pauline Sameshima's doctoral dissertation Winner of the 2007 Arts Based Educational Research ABER Outstanding Dissertation Award by the American Educational Research Association AERA This award is for the best dissertation that explores is an exemplar of and pushes the boundaries of arts based educational research The book showcases a PhD dissertation written in the form of an epistolary bildungsroman a didactic novel of personal developmental journeying The work is a fiction letters from a graduate student to the professor she is in love with embedded in developmental understanding of living the life of a teacher researcher The work shares the possibilities of how artful research informs processes of scholarly inquiry and honours the reader's multi perspective as integral to the research project's transformative potential Parallax is the apparent change of location of an object against a background due to a change in observer position or perspective shift The concept of parallax encourages researchers and teachers to acknowledge and value the power of their own and their readers and students shifting subjectivities and situatedness which directly influence the constructs of perception interpretation and learning The novel format ties themes and characters together just as storytelling can bind theory and practice Norman Denzin 2005 supports the pedagogical and libratory nature of the critical democratic storytelling imagination He hails this book as bold innovative a wild transformative text almost unruly a new vision for critical reflexive inquiry The love story and issues of teacher learner role boundaries are controversial and largely unspoken of in educational settings and the letter format is voyeuristic In this sense the audience is being given a peek a look at the unrevealed One of the advantages of the epistolary novel is its semblance of reality and the difficulty for readers to distinguish the text from genuine correspondence Wurzbach 1969 The genre allows the reader access to the writing character's intimate thoughts without perceived interference from the author's manipulation and conveys events with dramatic and sensational immediacy Carafi 1997
