management system framework that helps organizations to quantify and manage workforce competencies and align them to business needs. An objective and transparent system for both employees and managers alike, the RCM helps managers make quantitative decisions to develop strategies for staffing needs, competency development, career progression and succession planning in the workforce. It also helps employees to identify the roles suited to their aspirations and capabilities and to take responsibility for their development. The right people for the right roles is key to effective workforce management and workforce competencies must be optimally deployed to improve productivity, enhance job satisfaction and reduce attrition. At the same time, information technology (IT) businesses are under constant pressure to respond quickly to the ever-changing technology and business trends. Although some organizations take a myopic hire and fire approach in order to succeed, an organization must continually upgrade its workforce's competencies in line with new demands.

Online Engineering and Society 4.0 Michael E. Auer, Kalyan Ram Bhimavaram, Xiao-Guang Yue, 2021-09-19. This book presents the general objective of the REV2021 conference, which is to contribute and discuss fundamentals, applications and experiences in the field of Online and Remote Engineering, Virtual Instrumentation and other related new technologies like Cross Reality, Data Science, Big Data, Internet of Things, Industrial Internet of Things, Industry 4.0, Cyber Security and M2M Smart Objects. Nowadays, online technologies are the core of most fields of engineering and the whole society and are inseparably connected, for example, with Internet of Things, Industry 4.0, Industrial Internet of Things, Cloud Technologies, Data Science, Cross Mixed Reality, Remote Working Environments, Online Biomedical Engineering, to name only a few. Since the first REV conference in 2004, we tried to focus on the upcoming use of the Internet for engineering tasks and the opportunities as well as challenges around it. In a globally connected world, the interest in online collaboration, teleworking, remote services and other digital working environments is rapidly increasing. Another objective of the conference is to discuss guidelines and new concepts for engineering education in higher and vocational education institutions, including emerging technologies in learning, MOOCs, MOOLs and Open Resources. REV2021 on Online Engineering and Society 4.0 was the 17th in a series of annual events concerning the area of Remote Engineering and Virtual Instrumentation. It has been organized in cooperation with the International Engineering and Technology Institute (IETI) as an online event from February 24 to 26, 2021.
