This book provides an integrated approach to cognitive linguistic mediation with aims toward the efficiency of knowledge transfer and acquisition. Problems are approached through the prism of cognitive modelling and mapped to such fields as intercultural and interdisciplinary communication and second language teaching. The novelty lies in the synergies between linguistics, cognitive science, artificial intelligence, culture, and industry. These fields come together through ontological and metaphorical modelling and the attempts to automate such. This text provides a theoretical background for research on mediation, covering cognitive and communicative perspectives, metaphoricity of terms, and the ontologization of human knowledge. It includes detailed descriptions of methods for different types of cognitive modelling and is intended for students and researchers concerned with terminology, cognitive linguistics, applied linguistics, pragmatics, computational linguistics, literature studies, morphology, syntax, and semantics. **Build A Successful Consulting Practice: For Black Women** Michaela Dosunmu, 2025-04-16.
