Proceedings Of The 2nd International Symposium On Extenics And Innovation Methods:

Extenics and Innovation Methods Wen Cai, Chunyan Yang, Florentin Smarandache, Luigi Vladareanu, Qiaoxing Li, Guangtian Zou, Yanwei Zhao, Xingsen Li, 2013-07-15 Society forges ahead in the process of solving various contradictory problems and it is ceaselessly innovating. It is the desire of mankind to use computers and computing networks to help deal with contradictory problems and to conduct innovative activities. Using formal models to discuss object extension and the possibility of change as well as the rules and methods for innovation, Extenics is applied to solving contradictory problems and has become the basic theory, method, and instrument to achieve this goal. In the 30 years since the foundation of Extenics, researchers have built relatively complete theoretical systems, extension theory, studied formal and modeling innovation methods, extension innovation methods, and launched the applications in various fields such as information design, automation, and management, etc. Extension engineering, Extension theory, the extension innovation method, and extension engineering jointly constitute the new discipline Extenics. At the same time, the practical activities of engineering technology and management promote the integration of various innovation methods such as TRIZ and brainstorming, etc. This book collects together from scholars in various fields the research achievements in Extenics and innovation methods in order to facilitate and promote the development of Extenics and the various innovation theories and methods as well as to improve its innovative capacity in academic and business circles. *Innovative Digital Practices and Globalization in Higher Education*

Keengwe, Jared, 2023-02-17 We are moving toward a future in which digital practices are becoming more ubiquitous. Also, there is evidence to suggest that innovative digital practices are changing the face of 21st century learning environments.
