Singh,2012-12-06 and Literature Review Chapter 1 1 INTRODUCTION AND LITERATURE REVIEW The exploration for oil and gas in ever increasing water depths has given an impetus to research efforts on the behaviour of offshore structures under ocean environment These structures are continuously subjected to environmental loading because of waves wind and current A response analysis is required to assess the safety of offshore structure under severe storm conditions as well as for estimation of damage caused by less severe but more frequently occurring sea states A majority of the reported failures in the life time of offshore structures are in fact fatigue failures The offshore structures are usually built in the form of welded tubular structures The joints of these tubular members experience the fatigue damage mainly due to small defects in welding which act as crack initiators high stress concentrations and the variable loads The variable loads due to the ocean waves cause cyclic stress variation in the structural members and the accumulated effect of these stresses results in the fatigue failure Fatigue Analysis of Offshore Structures M.

Arockiasamy,1983\* **Fatigue Handbook** A. Almar-Naess,1985 Soon after oil and gas exploration and production began in the North Sea in the 1960s it became apparent that the steel structure design developed for offshore activities in the Gulf of Mexico was not adequate when transferred to the rigorous North Sea environment Realizing the great need for a better understanding of the fatigue phenomenon concerned materials scientists at SINTEF and Det norske Veritas prepared a five year programme for intensified research on fatigue of offshore steel structures It became the National Five Year Programme for Fatigue of Offshore Steel Structures in 1981 This text comprises a study of fatigue in offshore steel structures It seeks to make results in the area available in a form that can be utilized and understood by those responsible for the different stages in engineering design fabrication and service of offshore structures
