Reading for Evidence and Interpreting Visualizations in Mathematics and Science Education Stephen P.

Norris, 2012-09-17 CRYSTAL Alberta was established to research ways to improve students understanding and reasoning in science and mathematics To accomplish this goal faculty members in Education Science and Engineering as well as school teachers joined forces to produce a resource bank of innovative and tested instructional materials that are transforming teaching in the K 12 classroom Many of the instructional materials cross traditional disciplinary boundaries and explore contemporary topics such as global climate change and the spread of the West Nile virus Combined with an emphasis on the use of visualizations the instructional materials improve students engagement with science and mathematics Participation in the CRYSTAL Alberta project has changed the way I think about the connection between what I do as a researcher and what I do as a teacher I have learned how to better translate scientific knowledge into language and activities appropriate for students thereby transforming my own teaching I also have learned to make better connections between what students are learning and what is happening in their lives and the world thereby increasing students interest in the subject and enriching their learning experience

Adapted Primary Literature Anat Yarden, Stephen P. Norris, Linda M. Phillips, 2015-03-16 This book specifies the foundation for Adapted Primary Literature APL a novel text genre that enables the learning and teaching of science using research articles that were adapted to the knowledge level of high school students More than 50 years ago J J Schwab suggested that Primary Scientific Articles afford the most authentic unretouched specimens of enquiry that we can obtain and raised for the first time the idea that such articles can be used for enquiry into enquiry This book the first to be published on this topic presents the realization of this vision and shows how the reading and writing of scientific articles can be used for inquiry learning and teaching It provides the origins and theory of APL and examines the concept and its importance It outlines a detailed description of creating and using APL and provides examples for the use of the enactment of APL in classes as well as descriptions of possible future prospects for the implementation of APL Altogether the book lays the foundations for the use of this authentic text genre for the learning and teaching of science in secondary schools The

Role of Language in Content Pedagogy Lay Hoon Seah, Rita Elaine Silver, Mark Charles Baildon, 2022-11-01 This book explores the importance of language in content learning It focuses on teachers roles knowledge and understanding of language in school contexts including academic language and disciplinary languages to support students It examines teachers language related knowledge base for content teaching which include teachers knowledge of and about language knowledge of their students and their pedagogical knowledge This book also explores how teachers knowledge of language students and content are linked as part of a larger pedagogical content knowledge which includes knowledge of the role of language in content learning As well it further considers literacy and literacies as part of this examination of teachers knowledge of language International Handbook of Research in History, Philosophy and Science Teaching Michael R.

Matthews,2014-07-03 This inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics It is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally The first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits of over thirty years research by a growing international and cosmopolitan community Fabio Bevilacqua Physics Department University of Pavia

Crossing the Border of the Traditional Science Curriculum Maurício Pietrocola,Ivã Gurgel,2017-08-24 Nations worldwide consider education an important tool for economic and social development and the use of innovative strategies to prepare students for the acquisition of knowledge and skills is currently considered the most effective strategy for nurturing engaged informed learners In the last decade especially European countries have promoted a series of revisions to their curricula and in the ways teachers are trained to put these into practice Updating curriculum contents pedagogical facilities for example computers in schools and teaching and learning strategies should be seen as a routine task since social and pedagogical needs change over time Nevertheless educational institutions and actors educational departments schools teachers and even students normally tend to be committed to traditional practices As a result of this resistance to change within educational systems implementing educational innovation is a big challenge The authors of the present volume have been involved with curriculum development since 2003 This work is an opportunity to present the results of more than a decade of research into experimental inventive approaches to science education Most chapters concern innovative strategies for the teaching and learning of new contents as well as methods for learning to teach them at the pre university school level The research is focused on understanding the pedagogical issues around the process of innovation and the findings are grounded in analyses of the limits and possibilities of teachers and students practices in schools
