Holism Christian McMillan,Roderick Main,David Henderson,2019-12-06 Holism Possibilities and Problems brings together leading contributors in a ground breaking discussion of holism The terms holism and holistic arouse strong emotional responses in contemporary culture whether this be negative or positive and the essays in this interdisciplinary collection probe each in its own way the possibilities and problems inherent in thinking holistically

Christian McMillan Roderick Main and David Henderson bring together established academics and emerging scholars across subject areas and disciplinary approaches to reveal the multiplicity and complexity of issues involved in holism Divided into four parts the chapters determine key strands of thinking explicitly or implicitly underpinning contemporary holistic thought including what ethical conclusions might most reasonably be drawn from such thought Accessible and diverse this extensive volume contains chapters from the perspective of history ecology psychotherapy poetry mythology and an especially strong representation of continental philosophy and Jungian depth psychology Due to its multi disciplinary nature the book represents an unparalleled discussion of the meanings and implications of holism Written by an innovative and international calibre of contributors this pioneering collection will be essential reading for practitioners in depth psychology and scholars of Jungian studies as well as academics and students of philosophy religious studies spirituality history and the history of ideas The book is a rich resource for the enhancement of critical reflection among all those with an interest in holism

Jung, Deleuze, and the Problematic Whole Roderick Main, Christian McMillan, David Henderson, 2020-09-01 This book of expert essays explores the concept of the whole as it operates within the psychology of Jung the philosophy of Deleuze and selected areas of wider twentieth century Western culture which provided the context within which these two seminal thinkers worked Addressing this topic from a variety of perspectives and disciplines and with an eye to contemporary social political and environmental crises the contributors aim to clarify some of the epistemological and ethical issues surrounding attempts such as those of Jung and Deleuze to think in terms of the whole whether the whole in question is a particular bounded system such as an organism person society or ecosystem or most broadly reality as a whole Jung Deleuze and the Problematic Whole will contribute to enhancing critical self reflection among the many contemporary theorists and practitioners in whose work thinking in terms of the whole plays a significant role [Answer to Jung](#) Lynn

Brunet, 2018-11-08 The Red Book is C G Jung's record of a period of deep penetration into his unconscious mind in a process that he called active imagination undertaken during his mid life period Answer to Jung Making Sense of The Red Book provides a close reading of this magnificent yet perplexing text and its fascinating images and demonstrates that the fantasies in The Red Book are not entirely original but that their plots characters and symbolism are remarkably similar to some of the higher degree rituals of Continental Freemasonry It argues that the fantasies may be memories of a series of terrifying initiatory ordeals possibly undergone in childhood using altered or spurious versions of these Masonic rites It then compares these initiatory scenarios with accounts of ritual trauma that have been reported since the 1980s This is the first full length study of The Red Book to focus on the fantasies themselves and provide such an external explanation for them Sonu Shamdasani describes The Red Book as an incomplete task that Jung left to posterity as a message in a bottle that would someday come ashore Answer to Jung brings its message to shore providing a coherent but disturbing interpretation of each of the fantasies and their accompanying images Chapters Chapter 4 of this book is freely available as a downloadable

Carl Jung Paul Bishop, 2014-03-15 Swiss born Carl Gustav Jung 1875-1961 was one of the pioneers of psychology largely responsible for the introduction of now familiar psychological terms such as introvert extrovert and collective unconscious. But in spite of this Jung has often remained on the fringes of academic discourse. Seeking to understand Jung in view of not only his life but also in light of his extensive reading and prolific writing, this new biography reclaims Jung as a major European thinker whose true significance has not been fully appreciated. Paul Bishop follows Jung from his early childhood to his years at the University of Basel and his close relationship and eventual break with Sigmund Freud. Exploring Jung's ideas, Bishop takes up the psychiatrist's suggestion that the tragedies of Goethe's Faust and Nietzsche's Thus Spoke Zarathustra mark the first glimmerings of a breakthrough of total experience in our Western hemisphere, engaging with Jung's scholarship to offer one of the fullest appreciations yet of his distinctive approach to culture. Bishop also considers the role that the Red Book, written between 1914 and 1930 but not published until 2009, played in the progression of Jung's thought, allowing Bishop to provide a new assessment of this divisive personality. Jung's attempt to synthesize the different parts of human life, Bishop argues, marks the man as one of the most important theorists of the twentieth century. Providing a compelling examination of the life of this highly influential figure, the concise and accessible Carl Jung will find a place on the shelves of students, scholars, and both clinical and amateur psychologists alike.

Jung's Technique of Active Imagination and Desoille's Directed Waking Dream Method Laner Cassar, 2020-06-07 Jung's Technique of Active Imagination and Desoille's Directed Waking Dream Method brings together Carl Jung's active imagination and Robert Desoille's *revue dirigée* directed waking dream method RED. It studies the historical development of these approaches in Central Europe in the first half of the 20th century and explores their theoretical similarities and differences, proposing an integrated framework of clinical practice. The book aims to study the wider European context of the 1900s which influenced the development of both Jung's and Desoille's methods. This work compares the spatial metaphors of interiority used by both Jung and Desoille to describe the traditional concept of inner psychic space in the waking dreams of Jung's active imagination and Desoille's RED. It also attempts a broader theoretical comparison between the procedural aspects of both RED and active imagination by identifying commonalities and divergences between the two approaches. This book is a unique contribution to analytical psychology and will be of great interest for academics, researchers, and postgraduate students interested in the use of imagination and mental imagery in analysis, psychotherapy, and counselling. The book's historical focus will be of particular relevance to Jungian and Desoillian scholars since it is the first of its kind to trace the connections between the two schools and it gives a detailed account of Desoille's early life and his first written works. This book was a Gradiva Award nominee for 2021.
