through limited and carefully controlled trials much as proposed new drugs are tested before being allowed in widespread use The committee recommended that a new independent entity be created to work with private industry in evaluating new concepts and recommending changes to regulatory agencies Limited pilot tests would be required which would need to be carefully designed to avoid undue risks and ensure proper evaluation Special vehicles could be allowed to operate under carefully controlled circumstances just as oversize and overweight vehicles are allowed to operate under special permits in many states Changes in federal laws and regulations would be required to allow states to issue such permits on an expanded network of highways under the condition that a rigorous program of monitoring and evaluation be instituted Special Report 269 Summary 9th Circuit Update ,1991 **Polar Icebreakers in a Changing World** National Research Council,Transportation Research Board,Marine Board,Division on Earth and Life Studies,Polar Research Board,Committee on the Assessment of U.S. Coast Guard Polar Icebreaker Roles and Future Needs,2007-03-14 The United States has enduring national and strategic interests in the polar regions including citizens living above the Arctic circle and three year round scientific stations in the Antarctic Polar icebreaking ships are needed to access both regions Over the past several decades the U S government has supported a fleet of four icebreakers three multi mission U S Coast Guard ships the POLAR SEA POLAR STAR and HEALY and the National Science Foundation s PALMER which is dedicated solely to scientific research Today the POLAR STAR and the POLAR SEA are at the end of their service lives and a lack of funds and no plans for an extension of the program has put U S icebreaking capability at risk This report concludes that the United States should continue to support its interests in the Arctic and Antarctic for multiple missions including maintaining leadership in polar science The report recommends that the United States immediately program budget design and construct two new polar icebreakers to be operated by the U S Coast Guard The POLAR SEA should remain mission capable and the POLAR STAR should remain available for reactivation until the new polar icebreakers enter service The U S Coast Guard should be provided sufficient operations and maintenance budget to support an increased regular and influential presence in the Arctic with support from other agencies The report also calls for a Presidential Decision Directive to clearly align agency responsibilities and budgetary authorities
