Building the Titanic: Constructing the 'Unsinkable' Ship

David Thompson reviews maritime historian John Barnard's new book on the infamous ship.

Building the Titanic by John Barnard offers readers a captivating history of the RMS Titanic – a ship that symbolises luxury, ambition, and eventual tragedy. The book is painstakingly researched, bringing together financial data, social history, and developments in engineering, to explain why and how the Titanic was built. A major achievement is Barnard's ability to convey the emotions experienced by key participants at each stage of the Titanic's story. (I had been a writer about this ship before the approach of engineering the reasons for the tragic sinking of the Titanic in their accounts of how it was built). Barnard reserves the tragedy for the second half of the book so that during the early chapters, the reader can enjoy the excitement that surrounded the construction of the ship.

Chapter one sets the stage in the early 20th century with an analysis of the socio-economic factors that led to the Titanic's conception. Barnard's exploration of the intense competition among the shipping companies of the day provides important insight into why the White Star Line, Titanic's owners, were so determined to build the world's largest passenger ship. Later in the book, when trying to make sense of decisions about the ship's construction and safety that appeared risky or even foolish, I found it helpful to read this chapter's explanation of the huge pressure White Star's owners faced.

Chapter two explains the complex financial deals behind the Titanic's construction. Barnard outlines the huge budget required by White Star, estimating it at an astonishing £500 million, equivalent to approximately \$200 million today. Interestingly, when he investigates the role played by the International Mercantile Marine Company (IMM) in providing the necessary financing, Barnard draws a unique conclusion: the fund-raising is complicated sequence of shares and bond issuing by both IMM and White Star. He then uses this to convincingly reject the story reported later that IMM financed the Titanic and argues instead that White Star financed IMM. It is an intriguing view that warrants further investigation.

Chapter three details the design and engineering details that defined the Titanic. Barnard provides a long list of specifics, such as the ship's length (in the centimetres), the number of rivets used and the precise amount of steel in the hull. (It's being an engineering enthusiast, I must admit my attention drifted a little here.) Luckily, this chapter is saved by a fascinating discussion of how the premium materials used in the construction fostered the infamous belief that the Titanic was 'unsinkable'.

Chapter four paints a vivid picture of what it was like to work on the construction of the Titanic at the Harland and Wolff shipyard in Belfast. It describes 15,000 workers employed, and Barnard meticulously describes the diverse range of skilled professionals, including boilermakers, electricians, and plumbers, who contributed their expertise. An especially revealing aspect of this chapter is the inclusion of handwritten accounts from workers' letters and diary entries. Reading these, it becomes clear that while workers faced long hours, poor safety standards and low wages, they were also swept up in the excitement of constructing the largest ship ever built. Barnard closes the first part of the book with an account of the ship's launch in 1911, watched by 100,000 spectators – a clear example of how Titanic had captured the public imagination.

Questions 27–30

- 28 At the time of construction, the Titanic was the most expensive ship ever built.
- 29 The detailed figures in chapter three lack interest.
- 30 Professional workers who constructed the Titanic were paid well for their skills.
