India in Space: Between Utility and Geopolitics Marco Aliberti, 2018-01-17 This book presents the renewing strategic vision and progressive diversification of the Indian space programme at the nexus socio economic development commerce and geopolitics It disentangles India's evolving rationales for engaging in space from a wide range of perspectives and provides novel and in depth assessment of the domestic regional and international factors influencing the pace and directions

of the country's space programme. The study hence includes an extensive analysis of India's path forward including a reflection on the long term evolution of its civil military and commercial space efforts as well as considerations on the toolbox India has at its disposal on the prospected adaptation of the space ecosystem and on the implications these evolutions may generate both domestically and internationally. A central part of this final analysis is more specifically devoted to elaborating on the prospects and opportunities for European stakeholders with the goal of identifying possible domains of closer and mutually beneficial Europe-India space cooperation and sorting out possible elements for a comprehensive European long term strategy towards India.

Planning in the 20th Century and Beyond Santosh Mehrotra, Sylvie Guichard, 2020-10-29

The Planning Commission played a crucial role in the type of development that India followed after independence. However even though most economic analyses of India mention the five year plans the Planning Commission as an institution remains little studied. This is why this book proposes to look backward examining the history of the idea of planning and the history and experience of planning in India. It also looks forward trying to evaluate beyond ideologies which role the practice of planning has and should have in contemporary India. It then proposes that the NITI Aayog the think tank founded on 1st January 2015 after the demise of the Planning Commission could learn from this experience. This book addresses three leading questions: why plan economic development? How to plan? And what exactly can should be planned? These questions are interrelated and the contributors of this volume each with their own focus propose elements of replies.
