Reality Squared Televisual Discourse On The Real:

Reality Squared James Friedman, 2002 Reality based television has come to play a major role in both production decisions and network strategy This text examines the representation of reality within the televisual viewing frame as well as the exponential growth of these programmes

Music and the Broadcast Experience Christina Baade, James A. Deaville, 2016-08-02 Music and the Broadcast Experience explores the complex ways in which music and broadcasting have developed together throughout the twentieth and into the twenty first centuries It brings into dialogue researchers working in media and music studies explores and develops crucial points of contact between studies of music in radio and music in television and investigates the limits persistence and extensions of music broadcasting in the Internet era The book presents a series of case studies that address key moments and concerns in music broadcasting past and present written by leading scholars in the field who hail from both media and music studies Unified by attentiveness both to musical sound and meaning and to broadcasting structures practices audiences and discourses the chapters in this collection address the following topics the role of live orchestral concerts and opera in the early development of radio and their relation to ideologies of musical uplift the relation between production culture music and television genre the function of music in sponsored radio during the 1930s the fortunes of musical celebrity and artistic ambition on television questions of music format and political economy in the development of online radio and the negotiation of space community and participation among audiences online and offline in the early twenty first century The collection s ultimate aim is to explore the usefulness and limitations of broadcasting as a concept for understanding music and its cultural role both historically and today

The Triumph of Reality TV Leigh H. Edwards, 2013-01-09 This book provides an up to date account of how reality TV has developed why it has become the most popular genre on television today and how the explosion in reality TV signals new developments in American media culture The reasons behind reality TV s continued popularity go beyond the sensationalism and low production cost of these programs there is much more to the genre s continued success than just escapism or guilty pleasure TV The Triumph of Reality TV The Revolution in American Television identifies and explores five key media trends reality TV has used to continually draw in viewers and ensure success These media trends include innovations in storytelling making emotional appeals to viewers and applying content from television to other media such as films music albums webisodes online games and smart phone apps Author Leigh H Edwards also analyzes how reality TV shows target themes of social conflict such as changing ideas of the American family and address common anxieties and tensions in American society such as gender race class and economic struggle A wide variety of reality shows including American Idol Celebrity Rehab Jackass Run s House Survivor and The Hills are profiled An appealing read for students scholars and general readers alike this book provides fascinating insights into the complexities of a seemingly simplistic form of mass entertainment

The Pop Music Idol and the Spirit of Charisma T. Cvetkovski, 2015-09-01 This book makes a case for the synergetic union between reality

TV and the music industry It delves into technological change in popular music and the role of music reality TV and social media in the pop production process It challenges the current scholarship which does not adequately distinguish the economic significance of these developments *Reality TV* Annette Hill,2005 Drawing on quantitative and qualitative audience research to understand how viewers categorize the reality genre From Animal Hospital to Big Brother this book examines the voices of people who watch reality programmes *Restyling Factual TV* Annette Hill,2007-06-11 Addressing the wide range of programmes and formats from news to documentary to popular factual genres Annette Hill s new book examines the ways viewers navigate their way through a busy noisy and constantly changing factual television environment Restyling Factual TV addresses the wide range of programmes that fall within the category of factuality from politics to natural history to reality entertainment Based on research with audiences of factual TV primarily in Sweden and the UK but with reference to other countries such as the US this book tackles issues such as legitimacy ethics and value in contemporary news and current affairs documentary and reality programming Drawing on the ethics of truth telling and notions of quality this wide ranging authoritative book expands the debate on popular factual entertainment and will be a welcome addition to the current literature **Entertaining television** Su Holmes,2015-11-01 Entertaining television challenges the idea that the BBC in the 1950s was elitist and staid upholding Reithian values in a paternalistic even patronising way By focusing on a number of often controversial programme case studies such as the soap opera the quiz game show the problem show and programmes dealing with celebrity culture Su Holmes demonstrates how BBC television surprisingly explored popular interests and desires She also uncovers a number of remarkable connections with programmes and topics at the forefront of television today ranging from talk shows Reality TV even to our contemporary obsession with celebrity The book is iconoclastic percipient and grounded in archival research and will be of use to anyone studying television history *The Television Entrepreneurs* Raymond Boyle,Lisa W. Kelly,2016-03-03 With business seemingly everywhere on television from the risks of the retail and restaurant trade to pitching for investment or competing to become the next apprentice The Television Entrepreneurs draws upon popular business oriented shows such as The Apprentice and Dragons Den to explore the relationship between television and business Based on extensive interviews with key industry and business figures and drawing on new empirical research into audience perceptions of business this book examines our changing relationship with entrepreneurship and the role played by television in shaping our understanding of the world of business The book identifies the key structural shifts in both the television industry and the wider economy that account for these changing representations whilst examining the extent to which television s developing interest in business and entrepreneurial issues is simply a response to wider social and economic change in society Does a more commercial and competitive television marketplace for instance mean that the medium itself through a particular focus on drama entertainment and performance now plays a key role in re defining how society frames its engagements with business finance entrepreneurship risk and

wealth creation Mapping the narratives of entrepreneurship constructed by television and analysing the context that produces them The Television Entrepreneurs investigates how the television audience engages with such programmes and the possible impact these may have on public understanding of the nature of business Secular Magic and the Moving Image Max Sexton, 2017-12-14 The power of the moving image to conjure marvelous worlds has usually been to understand it in terms of move magic On film a fascination for enchantment and wonder has transmuted older beliefs in the supernatural into secular attractions But this study is not about the history of special effects or a history of magic Rather it attempts to determine the influence and status of secular magic on television within complex modes of delivery before discovering interstices with film Historically the overriding concern on television has been for secular magic that informs and empowers rather than a fairytale effect that deceives and mystifies Yet shifting notions of the real and the uncertainty associated with the contemporary world has led to television developing many different modes that have become capable of constant hybridization The dynamic interplay between certainty and indeterminacy is the key to understanding secular magic on television and film and exploring the interstices between them Sexton ranges from the real time magic of street performers such as David Blaine Criss Angel and Dynamo to Penn and Teller's comedy magic to the hypnotic acts of Derren Brown before finally visiting the 2006 films The Illusionist and The Prestige Each example charts how the lack of clear distinctions between reality and illusion in modes of representation and presentation disrupt older theoretical oppositions Secular Magic and the Moving Image not only re evaluates questions about modes and styles but raises further questions about entertainment and how the relations between the program maker and the audience resemble those between the conjuror and spectator By re thinking these overlapping practices and tensions and the marking of the indeterminacy of reality on media screens it becomes possible to revise our understanding of inter medial relations **Television after TV** Jan Olsson, Lynn Spigel, 2004-11-30 A critical reassessment of television and television studies in the age of new media
