Real Fiscal Responsibility Vol 1 The Progressive Give Up Formula:

The Future of the International Labour Organization in the Global Economy Francis Maupain, 2013-10-23 The International Labour Organization was created in 1919 as part of the Treaty of Versailles that ended the First World War to reflect the belief that universal and lasting peace can be accomplished only if it is based on social justice As the oldest organisation in the UN system approaching its 100th anniversary in 2019 the ILO faces unprecedented strains and challenges Since before the financial crisis the global economy has tested the limits of a regulatory regime which was conceived in 1919 The organisation s founders only entrusted it with balancing social progress with the constraints of an interconnected open economy but gambled almost entirely on tools of persuasion to ensure that this would happen Whether that gamble is still capable of paying off is the subject of this book by a former ILO insider with an unrivalled knowledge of its work The book forms part of a broader inquiry into the relevance of founding institutional principles to today s context and strives to show that the bet made on persuasion may yet pay off In part the text argues that there may be little alternative anyway showing that the pathways to more binding solutions are fraught with difficulty It also shows the ILO s considerable future potential for promoting effective universal regulations by extending its tools of persuasion in as yet insufficiently explored directions Starting with an examination of how the organisation s institutional context differs from 93 years ago the author goes on to evaluate the prospects of numerous proposals put forward today including the trade labour linkage but going beyond this As a case study in how strategic choices can be made under legal social and institutional constraints the book should be valuable not only to those with an interest in the ILO but to anyone who studies international organisation labour law law and society or political economy

Federal Register ,1993-07 China, Taiwan, and International Sporting Events Marcus P. Chu, 2022-07-07 Chu explores the politics behind Taiwanese cities pursuit of international sporting events and the Chinese authorities strategic measures in handling the relations with Taiwan since the 1990s It is assumed that the Chinese authorities constantly oppose Taiwanese

cities application for and boycott their subsequent holding of international sporting events Doing so would obstruct Taiwan's capacity to raise its visibility and influence in world society and defend the One China principle In fact the role of China in Taiwan's pursuit of international sporting events is not invariably as a fatal obstructer but sometimes a neutral bystander or even an enthusiastic supporter Chu examines the reasons behind this phenomenon Reviewing the 18 Taiwanese bidding attempts and four hosting projects he argues that China's inconsistent response is determined by the ups and downs of Cross Strait political ties As a result this book provides insight into the nexus between sports and politics in the context of China Taiwan rivalry A must read for scholars students and other watchers of Cross Strait relations **The Insurance Monitor**
