Neuroscience And Religion Brain Mind Self And Soul:

Neuroscience and Religion Volney P. Gay, 2009-01-01 This is a unique set of multidisciplinary reflections on how the neurosciences shape our understanding of religious experience and religious institutions Twelve scholars and scientists assess how advances in the neurosciences affect our traditional sense of mind self and soul

Neuroscience and Religion Volney P. Gay, 2009-08-16 For religious persons the notion of human being is tied inextricably to the notion of God or the gods and turns on this question what is human being How did we with our almost infinite capacities for thought change and domination come to be Imbued with powers far beyond any other animal humans are too faulty to be considered gods themselves Yet the idea of God or the gods appears in all distinctive human cultures it names the other pole of human it designates a being who realizes perfectly our imperfectly realized nature With the rise of new sciences come ancient anxieties about how we should define human being In the nineteenth century electricity and magnetism fascinated experts and captivated the lay public In the twenty first century advances in neuroscience open up vast new possibilities of mimicking and perhaps emulating human being In this book twelve scholars and scientists ask what if anything distinguishes Brain from Mind and Mind from Self and Soul

The Human Being Hans Schwarz, 2013-12-20 This overview of Christian anthropology by Hans Schwarz uniquely emphasizes three things 1 the biblical testimony 2 the historical unfolding of Christian anthropology through the centuries and 3 the present affirmation of Christian anthropology in view of rival options and current scientific evidence Schwarz begins by elucidating the special place occupied by human beings in the world then ponders the complex issue of human freedom and concludes by investigating humanity as a community of men and women in this world and in the world beyond While maintaining a strong biblical orientation Schwarz draws on a wide range of resources including philosophy and the natural sciences in order to map out what it means to be human Schwarz s Human Being will interest anyone who is concerned with how in the face of fascinating scientific insights we can intelligently talk today about human sinfulness human freedom and human beings as children of the God who created us

Soul, Psyche, Brain: New Directions in the Study of Religion and Brain-Mind Science K. Bulkeley, 2005-11-11 Soul Psyche Brain is a collection of essays that address the relationships between neuroscience religion and human nature Kelly Bulkeley s book highlights some startling new developments in neuroscience that have many people rethinking spirituality the mind body connection and cognition in general Soul Psyche Brain explores questions like what can knowledge about the neurological activities of the brain tell us about consciousness And what are the practical implications of brain mind science for ethics and moral reasoning

The Early History of Embodied Cognition 1740-1920 , 2016-01-12 This pioneering book evaluates the early history of embodied cognition It explores for the first time the life force Lebenskraft debate in Germany which was manifest in philosophical reflection medical treatise scientific experimentation theoretical physics aesthetic theory and literary practice esp 1740 1920 The history of vitalism is considered in the context of contemporary discourses on radical

reality or deep naturalism We ask how animate matter and cognition arise and are maintained through agent environment dynamics Whitehead or performance Pickering This book adopts a nonrepresentational approach to studying perception action and cognition which Anthony Chemero designated radical embodied cognitive science From early physiology to psychoanalysis from the microbiome to memetics appreciation of body and mind as symbiotically interconnected with external reality has steadily increased Leading critics explore here resonances of body mind and environment in medical history Reil Hahnemann Hirschfeld science Haller Goethe Ritter Darwin L Bchner musical aesthetics E T A Hoffmann Wagner folklore Grimm intersex autobiography Baer and stories of crime and aberration Nordau Dblin Science and literature both prove to be continually emergent cultures in the quest for understanding and identity This book will appeal to intertextual readers curious to know how we come to be who we are and ultimately how the Anthropocene came to be

Human Identity at the Intersection of Science, Technology and Religion Christopher C. Knight, 2016-05-13

Humans are unique in their ability to reflect on themselves Recently a number of scholars have pointed out that human self conceptions have a history Ideas of human nature in the West have always been shaped by the interplay of philosophy theology science and technology The fast pace of developments in the latter two spheres neuroscience genetics artificial intelligence biomedical engineering call for fresh reflections on what it means now to be human and for theological and ethical judgments on how we might shape our own destiny in the future The leading scholars in this book offer fresh contributions to the lively quest for an account of ourselves that does justice to current developments in theology science technology and philosophy

Catholic Neurotheology Andrew Newberg, Mary Clare Smith, 2024-07-02 The topic of neurotheology has garnered increasing attention in the academic religious scientific and popular worlds It is the field of study that explores the intersection between the brain and religious and spiritual phenomena However there have been no extensive attempts at exploring specifically how Catholic religious thought and experience may intersect with neurotheology The purpose of Catholic Neurotheology is to fully engage this groundbreaking area Topics are related to a neurotheological approach to the foundational Catholic beliefs derived from Scripture and Tradition an exploration of the various elements of Catholicism and of Catholic rituals and practices and a review of Catholic spiritualities and mysticism Specific Catholic scholars are considered in terms of the relationships among their ideas teachings and different brain processes Catholic Neurotheology engages these topics in an easy to read style and incorporates scientific religious philosophical and theological aspects of the emerging field of neurotheology By reviewing the concepts in a stepwise simple yet thorough discussion readers regardless of their background will be able to understand the complexities and breadth of neurotheology from a Catholic perspective More broadly issues include a review of the neurosciences and neuroscientific techniques religious and spiritual experiences theological development and analysis liturgy and ritual philosophy epistemology and ethics and social implications all from a Catholic perspective

Vying for Truth - Theology and the Natural Sciences

Hans Schwarz,2014-06-18 The emancipation of the natural sciences from religion was a gradual affair during the last four centuries Initially many of the leading scientists were churchmen indicating a symbiosis between faith and reason Due to the increasing specialization in the sciences this close connection came to an end often leading to antagonism and mutual suspicion This book traces this historical development with its twists and turns in both Europe and North America It depicts the major players in this story and outlines their specific contributions The main focus is on the 19th and 20th centuries with figures such as Darwin and Hodge but also Beecher and Abbott in the 19th century In the 20th century the narrative starts with Karl Barth and moves all the way to Hawking and Tipler Special attention is given to representatives from North America Great Britain and Germany In conclusion important issues are presented in the present day dialogue between theology and the natural sciences The issue of design and fine tuning is picked up and advances in brain research Finally technological issues are assessed and the status of medicine as a helpmate for life is discussed An informative and thought provoking book

Creation and Humanity Veli-Matti Karkkainen,2015-03-26 The third installment in a wide and deep constructive theology for our time This third volume of Veli Matti Karkkainen s ambitious five volume theology project develops a Christian theology of creation and humanity theological anthropology in dialogue with the Christian tradition with contemporary theology in all its global and contextual diversity and with other major living faiths Judaism Islam Buddhism and Hinduism In constructing his theology of creation and humanity Karkkainen uniquely engages the natural sciences including physical cosmological and neuroscientific theories He devotes particular attention to the topics of divine action in a world subjected to scientific study environmental pollution human flourishing and the theological implications of evolutionary theory with regard to both cosmos and humanity

Religion and Psychiatry Peter Verhagen,Herman M. Van Praag,Juan José Lopez-Ibor,John Cox,Driss Moussaoui,2012-02-27 Religion and spirituality is very much alive and shapes the cultural values and aspirations of psychiatrist and patient alike as does the choice of not identifying with a particular faith Patients bring their beliefs and convictions into the doctor patient relationship The challenge for mental health professionals whatever their own world view is to develop and refine their vocabularies such that they truly understand what is communicated to them by their patients Religion and Psychiatry provides psychiatrists with a framework for this understanding and highlights the importance of religion and spirituality in mental well being This book aims to inform and explain as well as to be thought provoking and even controversial Patiently and thoroughly the authors consider why and how when and where religion and spirituality are at stake in the life of psychiatric patients The interface between psychiatry and religion is explored at different levels varying from daily clinical practice to conceptual fieldwork The book covers phenomenology epidemiology research data explanatory models and theories It also reviews the development of DSM V and its awareness of the importance of religion and spirituality in mental health What can religious traditions learn from each other to assist the patient Religion and Psychiatry discusses this as well as the neurological basis of religious experiences It describes training

programmes that successfully incorporate aspects of religion and demonstrates how different religious and spiritual traditions can be brought together to improve psychiatric training and daily practice Describes the relationship of the main world religions with psychiatry Considers training policy and service delivery Provides powerful support for more effective partnerships between psychiatry and religion in day to day clinical care This is the first time that so many psychiatrists psychologists and theologians from all parts of the world and from so many different religious and spiritual backgrounds have worked together to produce a book like this one In that sense it truly is a World Psychiatric Association publication Religion and Psychiatry is recommended reading for residents in psychiatry postgraduates in theology psychology and psychology of religion researchers in psychiatric epidemiology and trans cultural psychiatry as well as professionals in theology psychiatry and psychology of religion
