end of this century **The Future of North Korea** Tsuneo Akaha, 2013-04-15 This volume explores the possibility of North Korea's soft landing as the most desirable outcome on the Korean Peninsula. The collection of essays by noted students of Asian security examines the perspectives and interests of North and South Korea, the United States, China, Russia, and Japan regarding North Korea's future, including the possibility of its neutrality. *The Possibility and Limit of Liberal Middle Power Policies* Kohei Imai, 2017-12-13 This book is a comprehensive analysis of Turkish foreign policy through the concept of middle power. The author explores why and how Turkey has constructed middle power identity based on liberal foreign policies in order to illuminate the change in post Cold War Turkish state identity in relation to foreign policy behaviors. The author further explores state identity and how changes of circumstances, norms, state self-perception, and the perceptions of others affect that identity. This is done first through a policy analysis of Turgut Zal Necmettin Erbakan and Ismail Cem and second through an examination of AKP's foreign policy experiences and ideas, especially in relation to Ahmet Davutoglu.

Permanent Neutrality Herbert R. Reginbogin, Pascal Lottaz, 2020-03-13 This collection examines the theory, practice, and application of state neutrality in international relations. With a focus on its modern day applications, the studies in this volume analyze the global implications of permanent neutrality for Taiwan, Russia, Ukraine, the European Union, and the United States. Exploring permanent neutrality's role as a realist security model capable of rivaling collective security, the authors argue that permanent neutrality has the potential to decrease major security dilemmas on the global stage. The Context of Environmental Politics Harold Sprout, Margaret Sprout, 2021-11-21 Now familiar to all is the cry that present rates of pollution, ecological disruption, and depletion of resources are leading inevitably to worldwide disaster. A multitude of immediate needs, however, compete for the staggering sums required to save the environment and the reduction of consumption, which must accompany such expenditures, holds little popular appeal. The decisions therefore must ultimately be political ones, but what choices are governments to make? Here is the essence of what Professors Harold and Margaret Sprout term the statesmen's dilemma. These noted scholars examine the dilemma in detail, exploring a wide range of points of view and developing a reasoned philosophical stance of their own. While their account of what is happening to the world and what we are doing about it is a gloomy one, it is notable that the authors do not entirely despair of man's future. In an epilogue, they propose a number of measures which, with luck, might enable coming generations to inherit a share of the earth's bounty. *The Context of Environmental Politics* is the first volume of *The Third Century Series*, a group of books exploring the major issues and challenges confronting the United States as it enters its third century. **Neutral Europe and the Creation of the Nonproliferation Regime** Pascal Lottaz, Yoko Iwama, 2023-11-03 Lottaz, Iwama, and their contributors investigate the role of neutral and nonaligned European states during the negotiations for the Treaty on the Nonproliferation of Nuclear Weapons (NPT). Focusing on the years from the Irish Resolution of 1958 until the treaty's opening for signatures ten years later, the nine chapters, written by area experts, highlight the processes and reasons for the political and diplomatic actions of the neutrals.

took and how those impacted the multilateral treaty negotiations The book reveals new aspects of the dynamics that lead to this most consequential multilateral breakthrough of the Cold War In part one three chapters analyze the international system from a bird s eye perspective discussing neutrality nonalignment and the nuclear order The second part features six detailed case studies on the politics and diplomacy of Ireland Sweden Finland Switzerland Austria and Yugoslavia Overall this study suggests that despite the volatile and dangerous nature of the early Cold War the balance of the strategic environment enabled actors that were not part of one or the other alliance system to play a role in the interlocking global politics that finally created the nuclear regime that defines international relations until today A valuable resource for scholars of nonproliferation the Cold War neutrality nonalignment and area studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
