9 X 3 GEAR TRANSMISSION

The double clutch is standard equipment on the Model TC31DA tractor equipped with the 9 x 3 gear transmission.

The double clutch permits the drive to the transmission to be disconnected from the main transmission to facilitate gear changes without stopping the drive to the PTO.

The double clutch utilizes two different size diameter discs. The transmission clutch disc is 225 mm (8.86") and PTO clutch disc is 215 mm (8.46"). A transmission clutch disc transmits power from the engine to the main transmission input shaft and a second clutch disc transmits power from the engine to the PTO input shaft.

The double clutch is mounted to a recessed flywheel with six bolts.

The double clutch pressure plate release lever height is adjustable and should be checked and adjusted, if required, whenever the clutch is serviced or a new clutch is installed.
