## **People Of The Bomb Portraits Of Americas Nuclear Complex:**

*People of the Bomb* Hugh Gusterson, 2004 E L Doctorow suggested that in the years since 1945 the nuclear bomb has come to compose the identity of the American people Developing this theme Hugh Gusterson shows how the military industrial complex has transformed public culture personal psychology in America to create a nuclear people *The Rey Chow Reader* Rey Chow, 2010-07-01 Rey Chow is arguably one of the most prominent intellectuals working in the humanities today Characteristically confronting both entrenched and emergent issues in the interlocking fields of literature film and visual studies sexuality and gender postcolonialism ethnicity and cross cultural politics her works produce surprising connections among divergent topics at the same time as they compel us to think through the ethical and political ramifications of our academic epistemic and cultural practices This anthology the first to collect key moments in Chow s engaging thought provides readers with an ideal introduction to some of her most forceful theoretical explorations Organized into two sections each of which begins with a brief statement designed to establish linkages among various discursive fields through Chow s writings the anthology also contains an extensive Editor s Introduction which situates Chow s work in the context of contemporary critical debates For all those pursuing transnational cultural theory and cultural studies this book is an essential resource Praise for Rey Chow Rey Chow is methodologically situated in the contentious spaces between critical theory and cultural studies and always attending to the implications of ethnicity Social Semiotics Rich and powerful work that provides both a dazzling synthesis of contemporary cultural theory and at the same time an exemplary critique of Chinese cinema China Information Should be read by all who are concerned with the future of human rights liberalism multiculturalism identity politics and feminism Dorothy Ko Wide ranging theoretically rich and provocative completely restructures the problem of ethnicity Fredric Jameson **Atomic Junction** Abena Dove Osseo-Asare, 2019-09-19 An innovative account of the first nuclear programme in independent Africa centring on the promises and perils of atomic research in Ghana *Simulation and Its Discontents* Sherry Turkle, 2022-11-01 How the simulation and visualization technologies so pervasive in science engineering and design have changed our way of seeing the world Over the past twenty years the technologies of simulation and visualization have changed our ways of looking at the world In *Simulation and Its Discontents* Sherry Turkle examines the now dominant medium of our working lives and finds that simulation has become its own sensibility We hear it in Turkle s description of architecture students who no longer design with a pencil of science and engineering students who admit that computer models seem more real than experiments in physical laboratories Echoing architect Louis Kahn s famous question What does a brick want Turkle asks What does simulation want Simulations want even demand immersion and the benefits are clear Architects create buildings unimaginable before virtual design scientists determine the structure of molecules by manipulating them in virtual space physicians practice anatomy on digitized humans But immersed in simulation we are vulnerable There are losses as well as gains Older scientists describe a younger

generation as drunk with code Young scientists engineers and designers full citizens of the virtual scramble to capture their mentors tacit knowledge of buildings and bodies From both sides of a generational divide there is anxiety that in simulation something important is slipping away Turkle s examination of simulation over the past twenty years is followed by four in depth investigations of contemporary simulation culture space exploration oceanography architecture and biology

**Command and Control** Eric Schlosser,2013-09-17 The Oscar shortlisted documentary Command and Control directed by Robert Kenner finds its origins in Eric Schlosser s book and continues to explore the little known history of the management and safety concerns of America s nuclear arsenal A devastatingly lucid and detailed new history of nuclear weapons in the U S Fascinating Lev Grossman TIME Magazine Perilous and gripping Schlosser skillfully weaves together an engrossing account of both the science and the politics of nuclear weapons safety San Francisco Chronicle A myth shattering expos of America s nuclear weapons Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America s nuclear arsenal A groundbreaking account of accidents near misses extraordinary heroism and technological breakthroughs Command and Control explores the dilemma that has existed since the dawn of the nuclear age How do you deploy weapons of mass destruction without being destroyed by them That question has never been resolved and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind While the harms of global warming increasingly dominate the news the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten Written with the vibrancy of a first rate thriller Command and Control interweaves the minute by minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years It depicts the urgent effort by American scientists policy makers and military officers to ensure that nuclear weapons can t be stolen sabotaged used without permission or detonated inadvertently Schlosser also looks at the Cold War from a new perspective offering history from the ground up telling the stories of bomber pilots missile commanders maintenance crews and other ordinary servicemen who risked their lives to avert a nuclear holocaust At the heart of the book lies the struggle amid the rolling hills and small farms of Damascus Arkansas to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons Command and Control takes readers into a terrifying but fascinating world that until now has been largely hidden from view Through the details of a single accident Schlosser illustrates how an unlikely event can become unavoidable how small risks can have terrible consequences and how the most brilliant minds in the nation can only provide us with an illusion of control Audacious gripping and unforgettable Command and Control is a tour de force of investigative journalism an eye opening look at the dangers of America s nuclear age

**Antinuclear Citizens** Akihiro Ogawa,2023-06-27 Following the Great East Japan Earthquake on March 11 2011 tsunamis engulfed the Fukushima Daiichi nuclear power plant located on Japan s Pacific Coast

leading to the worst nuclear disaster the world has seen since the Chernobyl crisis of 1986 Prior to this disaster Japan had the third largest commercial nuclear program in the world surpassed only by those in the United States and France nuclear power significantly contributed to Japan's economic prosperity and nearly 30% of Japan's electricity was generated by reactors dotted across the archipelago from northern Hokkaido to southern Kyushu This long period of institutional stasis was however punctuated by the crisis of March 11 which became a critical juncture for Japanese nuclear policymaking As Akihiro Ogawa argues the primary agent for this change is what he calls antinuclear citizens a conscientious Japanese public who envision a sustainable life in a nuclear free society Drawing on over a decade of ethnographic research conducted across Japan including antinuclear rallies meetings with bureaucrats and at renewable energy production sites Ogawa presents an historical record of ordinary people's actions as they sought to survive and navigate a new reality post Fukushima Ultimately Ogawa argues that effective sustainability efforts require collaborations that are grounded in civil society and challenge hegemonic ideology efforts that reimagine societies and landscapes especially those dominated by industrial capitalism to help build a productive symbiosis between industry and sustainability

**Military Waste** Joshua O. Reno, 2020-02-04 World War III has yet to happen and yet material evidence of this conflict is strewn everywhere resting at the bottom of the ocean rusting in deserts and floating in near Earth orbit In *Military Waste* Joshua O. Reno offers a unique analysis of the costs of American war preparation through an examination of the lives and stories of American civilians confronted with what is left over and cast aside when a society is permanently ready for war Using ethnographic and archival research Reno demonstrates how obsolete military junk in its various incarnations affects people and places far from the battlegrounds that are ordinarily associated with warfare Using a broad swath of examples from excess planes ships and space debris that fall into civilian hands to the dispossessed and polluted island territories once occupied by military bases to the militarized masculinities of mass shooters *Military Waste* reveals the unexpected and open ended relationships that non combatants on the home front form with a nation permanently ready for war

*Transecting Securityscapes* Till F. Paasche, James Derrick Sidaway, 2021-12-15 *The Theater of Operations* Joseph Masco, 2014-12-01 How did the most powerful nation on earth come to embrace terror as the organizing principle of its security policy In *The Theater of Operations* Joseph Masco locates the origins of the present day U.S. counterterrorism apparatus in the Cold War's balance of terror He shows how after the attacks of 9/11 the U.S. global War on Terror mobilized a wide range of affective conceptual and institutional resources established during the Cold War to enable a new planetary theater of operations Tracing how specific aspects of emotional management existential danger state secrecy and threat awareness have evolved as core aspects of the American social contract Masco draws on archival media and ethnographic resources to offer a new portrait of American national security culture Undemocratic and unrelenting this counterterror state prioritizes speculative practices over facts and ignores everyday forms of violence across climate capital and health in an unprecedented effort to anticipate and eliminate terror

threats real imagined and emergent

**Research Ethics for Human Geography** Helen F. Wilson, Jonathan

Darling, 2020-11-04 Research Ethics for Human Geography is a lively and engaging introduction to key ethical issues in geographical research by leading figures in the discipline. It addresses the wide range of ethical issues involved in collecting, analysing and writing up research across the social sciences and explores and explains the more specific ethical issues associated with different forms of geographical inquiry.
