Optimization of the optical wireless channel using WDM and DWDM technique is demonstrated. Designing and analysing the optical network is firstly executed. Cascaded amplifiers are used at power level of 12 dB and with net spectral efficiency that is 6.45 b/s/Hz. The cascaded amplifiers employed enhanced the Q factor and BER of the system and the gain achieved of the system was satisfactory. The signals are transmitted at a distance of 10,000 km with channel spacing of 100 GHz in conventional optical band 1530-1565 nm. DWDM is used at the channel spacing of 100GHz and the bandwidth of the designed system is 4500GHz.

WDM Systems and Networks Neophytos Neo Antoniadis, Georgios Ellinas, Ioannis Roudas, 2011-12-07. Modeling Simulation Design and Engineering of WDM Systems and Networks provides readers with the basic skills, concepts, and design techniques used to begin design and engineering of optical communication systems and networks at various layers. The latest semi-analytical system simulation techniques are applied to optical WDM systems and networks and a review of the various current areas of optical communications is presented. Simulation is mixed with experimental verification and engineering to present the industry as well as state-of-the-art research. This contributed volume is divided into three parts accommodating different readers interested in various types of networks and applications. The first part of the book presents modeling approaches and simulation tools mainly for the physical layer including transmission effects, devices, subsystems, and systems, whereas the second part features more engineering design issues for various types of optical systems including ULH access and in-building systems. The third part of the book covers networking issues related to the design of provisioning and survivability algorithms for impairment-aware and multi-domain networks. Intended for professional scientists, company engineers, and university researchers, the text demonstrates the effectiveness of computer-aided design when it comes to network engineering and prototyping. *Emerging Trends in Terahertz Engineering and System Technologies* Arindam Biswas, Amit Banerjee, Aritra Acharyya, Hiroshi Inokawa, 2021-02-12. This book highlights emerging trends in terahertz engineering and system technologies, mainly devices, advanced materials, and various applications in THz technology. It includes advanced topics such as terahertz biomedical imaging, pattern recognition, and tomographic reconstruction for THz biomedical imaging by use of machine learning and artificial intelligence. THz imaging radars for autonomous vehicle applications, THz imaging system for security and surveillance. It also discusses theoretical, experimental, established, and validated empirical work on these topics, and the intended audience is both academic and professional.
